1. Country / Territory Brief

ITC aims to assist France in creating sustainable trade linkages with the developing world by sourcing good quality products from these growing export markets. This page contains trade performance and investment data as well as highly innovative trade flow trends and analysis specially developed by ITC. This country page also makes use of ITC’s LegaCarta tool, which offers a country-specific analysis of the global multi-lateral rules impacting cross-border trade. You can also find information relating to the organizations working in France dedicated to assisting French importers of goods and services from the developing world as well as those organisations hoping to assist developing-country exporters who wish to sell their product or service in France.
2. People and Economy
