India is located in Southern Asia, bordering Bangladesh, Bhutan, China, Myanmar, Nepal, Pakistan, the Arabian Sea and the Bay of Bengal. Since its liberalisation in 1990s, the country has experienced a rapid economic development and become one of emerging economies. It stands third in purchasing power parity in the world making it one of the largest importers of goods and services. India’s key exports are engineering goods, petroleum products, gems and jewelry, agriculture products and textiles. It is also a major exporter of information technology and business outsourcing services. India major imports are petroleum products, gold and silver, electronic goods and precious stones. India’s major trading partners are China, the UAE, Singapore and the US. India is a member of the Asia-Pacific Trade Agreement (APTA), the South Asian Association for Regional Cooperation (SAARC) and the World Trade Organization (WTO).

3.2.7 Trade Performance Index

The graph shows the Trade Performance Index of India for various sectors. The index includes categories such as Minerals, Chemicals, Fresh food, Basic manufactures, Transport equipment, Textiles, Miscellaneous manufacturing, Clothing, Non-electronic machinery, Processed food, Electronic components, Leather products, IT & consumable electronics, and Wood products. The data is presented in terms of US dollars and shows the change in world market share index (2009-2013) and the current index (2013).

4.2 Domestic and Foreign Market Access

Overview: Trade Policy and Business Environment

<table>

<tr>
<th>INDICATOR, UNITS</th>
<th>RANK/132</th>
<th>SCORE</th>

<tbody>
<tr>
<td>Domestic Market Access The pillar assesses the level and complexity of a country’s tariff protection as a result of its trade policy. This component includes the effective trade-weighted average tariff applied by a country, the share of goods imported duty free and the complexity of the tariff regime, measured through tariff variance, the prevalence of tariff peaks and specific tariffs, and the number of distinct tariffs.</td>
<td>135</td>
<td>2.86</td>
</tr>
<tr>
<td>Foreign Market Access The pillar assesses tariff barriers faced by a country’s exporters in destination markets. It includes the average tariffs faced by the country as well as the margin of preference in destination markets negotiated through bilateral or regional trade agreements or granted in the form of trade preferences.</td>
<td>94</td>
<td>1.99</td>
</tr>
<tr>
<td>Tariff rate (%) This indicator is calculated as a trade-weighted average of all the applied tariff rates, including preferential rates that a country applies to the rest of the world. The weights are the trade patterns of the importing country’s reference group (2012 data). An applied tariff is a customs duty that is levied on imports of merchandise goods.</td>
<td>122</td>
<td>12.37</td>
</tr>
<tr>
<td>Complexity of tariffs, index 1-7 (best) This indicator is calculated as the average of the following indicators: Tariff dispersion, Specific tariffs and Number of distinct tariffs. See description of each individual indicator for more details. Prior to averaging, values for each indicator were transformed to a 1–7 score, using the min-max method.</td>
<td>94</td>
<td>4.87</td>
</tr>
<tr>
<td>Tariffs dispersion (standard deviation) This indicator reflects differences in tariffs across product categories in a country’s tariff structure. The variance is calculated across all the tariffs on imported merchandise goods, at the 6-digit level of the Harmonized Schedule.</td>
<td>121</td>
<td>14.93</td>
</tr>
<tr>
<td>Tariffs peaks (%) This indicator is the ratio of the number of tariff lines exceeding three times the average domestic tariff (across all products) to the MFN (most-favoured nation) tariff schedule. The tariff schedule is equal to the total number of tariff lines for each country. These tariffs are revised on a yearly basis.</td>
<td>68</td>
<td>3.23</td>
</tr>
<tr>
<td>Specific tariffs (%) This indicator is the ratio of the number of Harmonized System (HS) tariff lines, with at least one specific tariff, to the total number of HS tariff lines. A specific tariff is a tariff rate charged on fixed amount per quantity (as opposed to ad valorem).</td>
<td>99</td>
<td>6.08</td>
</tr>
<tr>
<td>Number of distinct tariffs This indicator reflects the number of distinct tariff rates applied by a country to its imports across all sectors.</td>
<td>102</td>
<td>718.00</td>
</tr>
<tr>
<td>Share of duty-free imports (%) Share of trade, excluding petroleum, that is imported free of tariff duties, taking into account MFN tariffs and preferential agreements. Tariff data is from 2013 or most recent year available and imports data is from 2012.</td>
<td>120</td>
<td>10.81</td>
</tr>
<tr>
<td>Tariffs faced (%) This indicator is calculated as the trade-weighted average of the applied tariff rates, including preferential rates that the rest of the world applies to each country. The weights are the trade patterns of the importing country’s reference group (2012 data). A tariff is a customs duty that is levied by the destination country on imports of merchandise goods.</td>
<td>59</td>
<td>5.38</td>
</tr>
<tr>
<td>Index of margin of preference in destination markets, 0-100 (best) This indicator measures the percentage by which particular imports from one country are subject to lower tariffs than the MFN rate. It is calculated as the average of two components: 1) the trade-weighted average difference between the MFN tariff and the most advantageous preferential duty (advantage score), and 2) the ratio of the advantage score to the trade-weighted average MFN tariff level. This allows capturing both the absolute and the relative margin of preference.</td>
