This is a pdf version of the captioned country contents in the intracen web site of the International Trade Centre. This document was generated on 05.12.2014. For the latest information about ITC’s work and the country, please refer to www.intracen.org © International Trade Centre 2014

ITC encourages the reprinting and translation of its publications to achieve wider dissemination. Short extracts of this document may be freely reproduced, with due acknowledgement of the source. Permission should be requested for more extensive reproduction or translation. A copy of the reprinted or translated material should be sent to ITC.
Indonesia is located in South-Eastern Asia, an archipelago between the Indian Ocean and the Pacific Ocean. The country has posted trade deficit in recent years as exports fell down due to slowdown in the global economy and imports surged. The country has become a net importer of oil with rising domestic consumption and stagnant oil production. Indonesia’s major exports are oil, gas, electrical equipment and machinery and main trading partners include China, Japan and the United States. A member of the Organization of the Petroleum Exporting Countries, G-20 and a driving force within the Association of Southeast Asian Nations (ASEAN), Indonesia has become a leading economy at the regional and multilateral levels.
## 2. People and Economy

### 2.1 People

| Total population (growth rates per annum) | 234,243,489 in 2012 with growth rates of 1.3% p.a during 2008-2012 |
| Population density (people per sq. km of land area) | 129 in 2012 |
| Female population | 49.7% in 2012 |
| Population below 15 years of age | 29.3% in 2008; 30.0% in 2012 |
| Urban population | 48.3% in 2012 |
| Population living below $1.25 a day at purchasing power parity (PPP) | 22.6% in 2012 |
| Ranking in the Human Development Index (HDI) | 121 out of 186 in 2012 |

### Health

Life expectancy at birth (years) (70); Mortality rate, under-5 (per thousand live births) (31) in 2012

### Education

Education index - expected and mean years of schooling (rank) (132 out of 191) in 2012

### Income level

GNI per capita in PPP terms (constant 2005 international $) (4,150) in 2012

### Inequality

Inequality-adjusted HDI (rank) (78 out of 191) in 2012

### Poverty

Multidimensional Poverty Index (rank) (49 out of 191) in 2012

### Gender

Gender inequality index (rank) (43 out of 191) in 2012

### Sustainability

Adjusted net savings (% of GNI) (n.a) in 2012

---

3. Trade Performance

3.1 General Trade Performance

3.1.1 Evolution of Trade Ratio to GDP - Goods

Evolution of the total imports and exports of goods of Indonesia

3.1.2 Evolution of Trade Ratio to GDP - Services

Evolution of the total imports and exports of services of Indonesia
3.1.3 Evolution of Total Trade

3.1.4 Trade Map
3.1.5 Export and Import by Leading Destination - Export

3.1.6 Export and Import by Leading Destination - Import
3.1.7 Evolution of Exports and Imports by Destination - Export

Indonesia’s exports by region of destination

Source: ITC Trade Map.
Note: EMCI includes Brazil, Russia, India, China, and South Africa.
EMCI includes countries outside EU and EFTA.
Arab States are member states of the Arab League minus Jordan.
Latin America includes Caribbean countries excluding Brazil, Chile, and Mexico.
Asia does not include China, India, and Japan.

3.1.8 Evolution of Exports and Imports by Destination - Import

Indonesia’s imports by region of origin

Source: ITC Trade Map.
Note: EMCI includes Brazil, Russia, India, China, and South Africa.
EMCI includes countries outside EU and EFTA.
Arab States are member states of the Arab League minus Jordan.
Latin America includes Caribbean countries excluding Brazil, Chile, and Mexico.
Asia does not include China, India, and Japan.
3.1.9 Total Export Growth

Source: ITC, calculations based on ITC’s Trade Competitiveness Map data.
Note: Graph shows decomposition of the country’s export growth in value terms by diversification pattern over the indicated period.

3.1.10 Marginal Export Growth

Source: ITC, calculations based on ITC’s Trade Competitiveness Map data.
Note: Graph shows decomposition of the country’s export growth in value by structural driving effects over the indicated period. Values are in US$ thousands.
3.1.11 Composition of Trade in Services - Export

[Graph showing the composition of trade in services exported by Indonesia from 2009 to 2020]

3.1.12 Composition of Trade in Services - Import

[Graph showing the composition of trade in services imported by Indonesia from 2009 to 2020]
3.1.13 Evolution of FDI

![Bar chart showing the evolution of FDI inflow in Indonesia as a percentage of GDP from 2002 to 2013.]

### Domestic and Foreign Market Access

#### Overview: Trade Policy and Business Environment

<table>
<thead>
<tr>
<th>INDICATOR, UNITS</th>
<th>RANK/132</th>
<th>SCORE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Domestic Market Access</td>
<td>The pillar assesses the level and complexity of a country's tariff protection as a result of its trade policy. This component includes the effective trade-weighted average tariff applied by a country, the share of goods imported duty free and the complexity of the tariff regime, measured through tariff variance, the prevalence of tariff peaks and specific tariffs, and the number of distinct tariffs.</td>
<td>26</td>
</tr>
<tr>
<td>Foreign Market Access</td>
<td>The pillar assesses tariff barriers faced by a country's exporters in destination markets. It includes the average tariffs faced by the country as well as the margin of preference in destination markets negotiated through bilateral or regional trade agreements or granted in the form of trade preferences.</td>
<td>37</td>
</tr>
<tr>
<td><strong>Tariff rate (%)</strong></td>
<td>This indicator is calculated as a trade-weighted average of all the applied tariff rates, including preferential rates that a country applies to the rest of the world. The weights are the trade patterns of the importing country's reference group (2012 data). An applied tariff is a customs duty that is levied on imports of merchandise goods.</td>
<td>62</td>
</tr>
<tr>
<td><strong>Complexity of tariffs, index 1-7 (best)</strong></td>
<td>This indicator is calculated as the average of the following indicators: Tariff dispersion, Specific tariffs and Number of distinct tariffs. See description of each individual indicator for more details. Prior to averaging, values for each indicator were transformed to a 1–7 score, using the min-max method.</td>
<td>61</td>
</tr>
<tr>
<td><strong>Tariffs dispersion (standard deviation)</strong></td>
<td>This indicator reflects differences in tariffs across product categories in a country's tariff structure. The variance is calculated across all the tariffs on imported merchandise goods, at the 6-digit level of the Harmonized Schedule.</td>
<td>94</td>
</tr>
<tr>
<td><strong>Tariffs peaks (%)</strong></td>
<td>This indicator is the ratio of the number of tariff lines exceeding three times the average domestic tariff (across all products) to the MFN (most-favoured nation) tariff schedule. The tariff schedule is equal to the total number of tariff lines for each country. These tariffs are revised on a yearly basis.</td>
<td>59</td>
</tr>
<tr>
<td><strong>Specific tariffs (%)</strong></td>
<td>This indicator is the ratio of the number of Harmonized System (HS) tariff lines, with at least one specific tariff, to the total number of HS tariff lines. A specific tariff is a tariff rate charged on fixed amount per quantity (as opposed to ad valorem).</td>
<td>79</td>
</tr>
<tr>
<td><strong>Number of distinct tariffs</strong></td>
<td>This indicator reflects the number of distinct tariff rates applied by a country to its imports across all sectors.</td>
<td>75</td>
</tr>
<tr>
<td><strong>Share of duty-free imports (%)</strong></td>
<td>This indicator measures the percentage by which particular imports from one country are subject to lower tariffs than the MFN rate. It is calculated as the average of two components: 1) the trade-weighted average difference between the MFN tariff and the most advantageous preferential duty (advantage score), and 2) the ratio of the advantage score to the trade-weighted average MFN tariff level. This allows capturing both the absolute and the relative margin of preference.</td>
<td>87</td>
</tr>
