

World Tariff Profiles

2023

SPECIAL TOPICS

1. World Tariff Profiles: the evolution of market access over 16 years
2. MTN Categories: product classification for WTO trade statistics and policy analysis

About this publication

World Tariff Profiles is a co-publication of the WTO, ITC and UNCTAD on market access for goods. This annual publication provides comprehensive information on the tariffs and non-tariff measures imposed by over 170 countries and customs territories. Non-WTO members are included if data on the tariffs they applied in 2022 or 2021 are available in the databases of the WTO, ITC or UNCTAD.

For more information

The statistical tables included in this report can be downloaded from the WTO web site at www.wto.org/statistics

Disclaimer

The *World Tariff Profiles* and its contents are the sole responsibility of the WTO Secretariat, ITC and UNCTAD, except for the opinion pieces written by the external contributors, which are the sole responsibility of their respective authors. The publication does not reflect the opinions or views of members of the WTO, ITC and UNCTAD. The authors of the publication also wish to exonerate those who have commented upon it from responsibility for any outstanding errors or omissions.

General note and abbreviations

Abbreviations

AVG	Average
AG	Agricultural products
AVE	<i>Ad valorem</i> equivalent
HS	Harmonized System (nomenclature)
Max	Maximum duty
MFN	Most favoured nation
NAV	Non- <i>ad valorem</i> duty
Non-AG	Nonagricultural products
SSG	Special safeguards
TL	Tariff line
UV	Unit value

Notations

–	Not applicable
0	= 0 (not rounded)
0.0	> 0 and < 0.05
100	= 100 (not rounded)
100.0	> 99.95 and < 100
Blank	Bound or applied duties and/or imports are not available at all for a given country or territory.
<i>Italics</i>	Maxima, based on AVE estimates are printed in italics; this also applies in cases when the <i>ad valorem</i> is part of a compound or mixed duty as ceiling or floor.
US\$	United States dollar

The statistics related to applied tariffs and imports are calculated using data which are based on the HS nomenclature adopted by the country for the reference year. For statistics on bound tariffs, the calculations are based on the approved schedule of concessions of the WTO member. In previous issues of World Tariff Profiles, each schedule is based on the HS version which the member used when it acceded to the WTO. Starting with the 2010 issue of this publication, bound tariff statistics are based on the approved schedule of concessions for each member in the most recent HS version. This might have some implications on the historical series of various bound tariff indicators affected by the use of a different nomenclature. While the member's commitments have not changed as a result of the transposition, some aggregate statistics might have been affected as a consequence of the change to another HS version.

The classification of products into agricultural and non-agricultural is based on Annex 1 of the WTO Agreement on Agriculture which lists all products covered in the Agreement. The Annex enumerates HS codes that are subject to the agriculture negotiations in the WTO and are considered agricultural products. HS codes which are not in Annex 1 are subject to the non-agricultural market access negotiations and are considered non-agricultural products.

In the comparison of bound and applied duties within countries and across countries, the following caveats need to be taken into account besides that of the effects of different HS versions used and

nomenclature breakdowns. These are: (1) binding coverage; (2) tariff bindings not fully implemented; and (3) AVEs.

- While binding commitments cover all agricultural products, in principle, this is not always the case for non-agricultural goods. There are a number of WTO members where the binding coverage for non-agricultural products is less – and sometimes much less – than 100 per cent. Also, a number of developed countries have not yet fully bound all the tariff lines in their schedules. Any comparison of bound and applied tariff indicators is only valid in cases of full binding coverage.
- For most WTO members, except the most recently acceded ones, all commitments dating back to the Uruguay Round have by now been implemented. In cases where commitments are not yet fully implemented, one may see MFN applied averages or maxima exceeding the corresponding bound duty indicators.
- Last but not least, the calculation of AVEs may affect the comparison between bound and applied duties when the changes in nomenclature have resulted in the use of different unit values. In other cases, bound duties have been expressed in a way that is not directly comparable with the currently used applied duties. In a number of cases, the estimated MFN applied AVEs were adjusted when the corresponding bound tariff lines were defined in *ad valorem* terms. In these cases, the corresponding bound *ad valorem* duty was used as ceiling for the AVE estimate.

Introduction

WTO

The World Trade Organization (WTO) is the only global international organization dealing with the rules of trade between nations. At its heart are the WTO agreements, negotiated and signed by the bulk of the world's trading nations and ratified in their parliaments. The goal is to help producers of goods and services, exporters, and importers conduct their business. The WTO's main function is to ensure that trade flows as smoothly, predictably and freely as possible. It does this by administering trade agreements, acting as a forum for trade negotiations, settling trade disputes, reviewing national trade policies, assisting developing countries in trade policy issues through technical assistance and training programmes and cooperating with other international organizations.

ITC

The International Trade Centre (ITC) is the joint agency of the World Trade Organization and the United Nations. ITC enables small business export success in developing countries by providing, with partners, sustainable and inclusive trade development solutions to the private sector, trade support institutions and policymakers. ITC's strategic objectives are to strengthen the international competitiveness of enterprises, to develop the capacity of trade service providers to support businesses, and to support policymakers in integrating the business sector into the global economy.

UNCTAD

Established in 1964, the United Nations Conference on Trade and Development (UNCTAD) promotes the development-friendly integration of developing countries into the world economy. UNCTAD has progressively evolved into an authoritative knowledge-based institution whose work aims to help shape current policy debates and thinking on development, with a particular focus on ensuring that domestic policies and international action are mutually supportive in bringing about sustainable development.

The *World Tariff Profiles* is a joint publication of the WTO, ITC and UNCTAD devoted to market access for goods. This statistical yearbook contains a comprehensive compilation of the main tariff parameters for each of the 164 WTO members plus other countries and customs territories where data is available. Each tariff profile presents information on tariffs imposed by each economy on its imports complemented with an analysis of the market access conditions it faces in its major export markets.

Statistics for all countries and territories are given in standardized tables which allow easy comparisons between countries/territories, between sectors and, specifically for WTO members, between bound and applied tariffs as well. The calculations are based on national tariff schedules and imports in conformity with a standard Harmonized System (HS) nomenclature version. To the extent possible, *ad valorem* equivalents (AVEs) of non-*ad valorem* tariffs are estimated and are included in the estimation of tariff indicators. Nonetheless, certain caveats apply in the interpretation of these indicators and the reader is advised to read the methodological notes that precede the statistical tables.

The publication is presented in five main parts. The first part shows summary tariff and trade statistics for all countries and territories for all products, as well as a breakdown into agricultural and non-agricultural products. The second part shows for each of these countries and territories one full page with disaggregation by sectors and duty ranges. It also contains a section on the market access conditions faced in their respective major export markets. The third part covers information on non-tariff measures which are of increasing importance in international trade. The fourth part contains the special topics which present new subjects in each edition. The annexes are in part five and include the data sources and the compilation of "Frequently Asked Questions".

The **summary tariff tables** in the first part are designed to allow

cross-country comparison as well as comparison of the levels of bound and applied duties. Apart from the standard indicators like tariff averages, maxima, percentage of duty-free tariff lines, peaks and non-*ad valorem* duties, it also contains indicators of tariff dispersion such as the number of distinct duties and the coefficient of variation. The calculation of these indicators is based, where applicable, on a pre-aggregation to HS six-digit subheadings, which leads to a standardization across countries and thus makes the comparisons more compatible.

Similarly, the **summary trade table** showing the imports and exports profile facilitates the comparison of selected indicators among the economies listed. The statistics are presented by agricultural and non-agricultural sector as well as for the total economy. The indicators related to the exports profile are based on mirror data reported by the importing economy.

The **tariff profiles** tables are divided into two blocks covering (A) the domestic market access protection and (B) the protection faced in the major export markets. In part A, information on bound and applied duties is shown by duty ranges and by sectors. Information for agricultural and non-agricultural duties is shown separately. In addition, there are indicators on the occurrence of special safeguards and on tariff quotas. In part B, the trade diversification and market access conditions in the five major export markets are depicted, broken down into agricultural and non-agricultural products.

The third part contains the summary tables on anti-dumping actions, countervailing duties and safeguard measures. The new special topics presented on the fourth part are entitled "The evolution of market access over 16 years of *World Tariff Profiles*" and the second one is "Product classification for WTO trade statistics and policy analysis – Multilateral Trade Negotiations (MTN) Categories".

I. Summary tables

	Tariff
Description of column headings	6
Technical notes	7
All products	8
Agricultural products	14
Non-agricultural products	20
	Trade
Description of column headings	26
Technical notes	27
Imports and exports profile	28

Description of column headings

Column headings	Description or method of calculation
Year of MFN applied tariff	Calendar year or start of fiscal year
Binding coverage	Share of HS six-digit subheadings containing at least one bound tariff line. Full binding coverage is indicated by 100 without further decimals. If some tariff lines are unbound but the result still rounds to 100 this is reflected by maintaining one decimal, i.e. 100.0.
Simple average	Simple average of the <i>ad valorem</i> or AVE HS six-digit duty averages.
Duty-free	Share of duty-free HS six-digit subheadings in the total number of subheadings in the product group. Partially duty-free subheadings are taken into account on a <i>pro rata</i> basis.
Non- <i>ad valorem</i> duties	Share of HS six-digit subheadings subject to non- <i>ad valorem</i> duties. When only part of the HS six-digit subheading is subject to non- <i>ad valorem</i> duties the percentage share of these tariff lines is used.
Duties > 15 %	Share of HS six-digit subheadings subject to <i>ad valorem</i> duties or AVEs greater than 15 per cent. When only part of the HS six-digit subheading is covered by such duties, the calculation is done on a <i>pro rata</i> basis.
Duties > 3 × AVG	Share of HS six-digit subheadings subject to <i>ad valorem</i> duties or AVEs greater than three times the national average. When only part of the HS six-digit subheading is covered by such duties, the calculation is done on a <i>pro rata</i> basis.
Concessions not yet implemented in 2022	Share of HS six-digit bound subheadings not yet implemented in 2022. When only part of the HS six-digit subheading is covered by such duties the calculation is made on a <i>pro rata</i> basis.
Maximum duty	Maximum tariff line level <i>ad valorem</i> duty or AVE.
Number of distinct duty rates	Number of distinct duty rates. Non- <i>ad valorem</i> duties are always treated as distinct because AVE calculations would always yield distinct AVEs. For this indicator, however, duties not provided are not included in the count.
Coefficient of variation	Standard deviation of tariff line duty rates divided by the simple tariff line level average of all duty rates. Includes only <i>ad valorem</i> duties or AVEs.
Number of MFN applied tariff lines	Total number of MFN applied tariff lines

Technical notes

Only duties and imports recorded under HS Chapters 01–97 are taken into account. Each applied tariff schedule is validated against the standard nomenclature at the HS six-digit subheading level of the HS version adopted by the country for the reference year. National tariff lines that do not follow this standard (i.e., the first six digits should be based on the standard subheading nomenclature of the HS version used by the country) are discarded and not taken into account. On the other hand, missing subheadings are added. Hence,

all calculations are based on the complete standard nomenclature. All simple averages are based on pre-aggregated HS six-digit averages. Pre-aggregation means that duties at the tariff line level are first averaged to HS six-digit subheadings. Subsequent calculations are based on these pre-aggregated averages.

To the extent possible, non-*ad valorem* duties are converted into *ad valorem* equivalents. The methodology used for the conversion is in Technical Annex B of *World Tariff Profiles 2006*.

Description of column headings

Column headings		Description or method of calculation
All indicators are calculated by sector and for all products.		
Imports Profile	Trade Year	Calendar year or start of fiscal year for trade data notified by reporting country/territory.
	Value of imports	Total amount of imports in billion US\$.
	Trade Weighted Average MFN Applied	HS six-digit MFN tariff averages weighted with HS six-digit import flows of the most recently available year.
	Duty-free imports	Share of imports of products for which the MFN duty is zero
Export profile statistics are based on reported imports of partner markets from the country/territory for the year indicated in Part B of the country table. Thus, the data are limited only to markets with notified imports data.		
Exports Profile	Diversification Index HS Chapter	Number of distinct HS chapters with trade flows after the exclusion of 5 per cent of smallest bilateral tariff line trade flows.
	Diversification Index HS 6-digit	Number of distinct HS 6-digit sub-headings with trade flows after the exclusion of 5 per cent of smallest bilateral tariff line trade flows.
	Applied Weighted Tariff Faced in Major Markets	Actual MFN or preferential tariff imposed by the five major trading partners in each sector to the products they import from the country/territory (i.e., to the products exported by the country/territory).

Technical notes

The indicators related to the imports profile are calculated from the reported imports data of the country. However, the exports profile are based on mirror data or the imports reported by the partner from the country. Thus, only data of reporting partners are included in the calculation of indicators for the exports profile.

Only duties and imports recorded under HS Chapters 01-97 are taken into account. Each applied tariff schedule is validated against the standard nomenclature at the HS six-digit subheading level of the HS version adopted by the country for the reference year. National tariff lines that do not follow this standard (i.e., the first six digits should be

based on the standard subheading nomenclature of the HS version used by the country) are discarded and not taken into account. On the other hand, missing subheadings are added. Hence, all calculations are based on the complete standard nomenclature. All simple averages are based on pre-aggregated HS six-digit averages. Pre-aggregation means that duties at the tariff line level are first averaged to HS six-digit subheadings. Subsequent calculations are based on these pre-aggregated averages.

To the extent possible, non-*ad valorem* duties are converted into *ad valorem* equivalents. The methodology used for the conversion is in Technical Annex B of *World Tariff Profiles 2006*.

1. The information provided by the European Union covers its 27 member States from 1 February 2020.

2. The information provided by Switzerland covers Liechtenstein.

3. For statistics on bound tariffs of the UK, the calculations are based on the UK submission of its full Schedule in HS2017 which has not yet been approved by all members.

Part A.1

Tariffs and imports: Summary and duty ranges

Row titles	Description or method of calculation
Simple average final bound	Simple average of final bound duties excluding unbound tariff lines.
Simple average MFN applied	Simple average of MFN applied duties.
Trade weighted average MFN applied	HS six-digit MFN tariff averages weighted with HS six-digit import flows of the most recently available year.
Imports in billion US\$	Imports in billion US\$.
Binding coverage	Share of HS six-digit subheadings containing at least one bound tariff line. The percentage share is also presented separately for non-agricultural (Non-AG) tariff lines. Full binding coverage is indicated by 100 without further decimals. If some tariff lines are unbound but the result still rounds to 100 this is reflected by maintaining one decimal, i.e. 100.0.
AG: Tariff quotas (in %)	Per cent of HS six-digit subheadings in the schedule of agricultural concession covered by tariff quotas. Partial coverage is taken into account on a <i>pro rata</i> basis.
AG: Special safeguards (in %)	Per cent of HS six-digit subheadings in the schedule of agricultural concessions with at least one tariff line subject to Special Safeguards (SSG). Partial coverage is taken into account on a <i>pro rata</i> basis.

Technical notes

Only duties and imports recorded under HS Chapters 01-97 are taken into account. Each applied tariff schedule is validated against the standard nomenclature at the HS six-digit subheading level of the HS version adopted by the country for the reference year. National tariff lines that do not follow this standard (i.e., the first six digits should be based on the standard subheading nomenclature of the HS version used by the country) are discarded and not taken into account. On the other hand, missing subheadings are added. Hence, all calculations are based on the complete standard nomenclature. All simple averages are based on pre-aggregated HS six-digit averages. Pre-aggregation means that duties at the tariff line level are first averaged to HS six-digit subheadings. Subsequent calculations are based on these pre-aggregated averages.

To the extent possible, non-*ad valorem* duties are converted into *ad valorem* equivalents. The methodology used for the conversion is in Technical Annex B of *World Tariff Profiles 2006*.

Part A.2

Tariffs and imports by product groups

Column heading		Description or method of calculation
Final bound duties	AVG	Simple average of final bound duties excluding unbound tariff lines
	Duty free	Share of duty-free HS six-digit subheadings in the total number of subheadings in the product group. Partially duty-free subheadings are taken into account on a <i>pro rata</i> basis.
	Max	Highest <i>ad valorem</i> duty or calculated AVE within the product group
	Binding in %	Share of HS six-digit subheadings containing at least one bound tariff line. Full binding coverage is indicated by 100 without further decimals. If some tariff lines are unbound but the result still rounds to 100 this is reflected by maintaining one decimal, i.e. 100.0.
MFN applied duties	AVG	Simple average of MFN applied duties.
	Duty free	Share of duty-free HS six-digit subheadings in the total number of subheadings in the product group. Partially duty-free subheadings are taken into account on a <i>pro rata</i> basis.
	Max	Highest <i>ad valorem</i> duty or calculated AVE within the product group
Imports	Share in %	Share of imports falling under product group
	Duty free in %	Share of MFN duty-free imports falling under product group in total imports in that product group. Partially duty-free subheadings are taken into account on a <i>pro rata</i> basis if tariff line imports are not available.

Frequency distribution by duty ranges

The shares by duty ranges in the frequency distribution are based on the *pro rata* shares of tariff line level duties in the standard HS six-digit subheadings. For example, if there are two tariff lines in one HS six-digit subheading, one with a duty of 10 and one with a duty of 20, then half of the HS six-digit subheading is allocated to the 5–10 range and the other half to the 15–25 range. The frequency distribution includes AVEs whenever those were calculated. The percentages by duty ranges add up to 100 per cent for MFN applied duties unless there are non-computable AVEs or missing tariff lines for which no separate category was allocated. For bound duties, the duty ranges add up to the percentage of the binding coverage unless there are non-computable AVEs or missing tariff lines. Please note that the use of different nomenclatures for bound and MFN applied duties affects the comparability of bound and MFN applied duty shares by frequency ranges.

When trade is available at the tariff line level, imports are allocated on a tariff line basis to the respective duty ranges. Otherwise, HS six-digit imports are allocated on a *pro rata* basis to duty ranges, e.g. if there are two tariff lines in one HS six-digit subheading, one with a duty of 10 and one with a duty of 20 then half of the HS six-digit imports are allocated to the 5–10 range and the other half to the 15–25 range.

Share of HS six-digit subheadings subject to non-*ad valorem* duties: when only part of the HS six-digit subheading is subject to non-*ad valorem* duties, the percentage share of these tariff lines is used.

Part B

Exports to major trading partners and duties faced

Column heading		Description or method of calculation
Bilateral imports	in Mill US\$	Total imports of major partner countries
Diversification: 95 % trade in no. of	HS 2 digit	Number of HS Chapters with trade flows after exclusion of 5 per cent of smallest bilateral tariff line trade flows.
	HS 6 digit	Number of HS six-digit subheadings with trade flows after exclusion of 5 per cent of smallest bilateral tariff line trade flows
MFN Average of traded TL	Simple	Simple average of MFN duties based only on tariff lines with imports
	Weighted	Trade-weighted average MFN duty
Preference margin	Weighted	Trade-weighted average difference between the MFN duty and the most advantageous preferential duty. Tariff lines where either MFN or preferential duties cannot be expressed in <i>ad valorem</i> terms have been excluded.
Duty-free imports	TL in %	Duty-free tariff lines in per cent of all bilateral trade flows; includes duty-free preferential treatment. Partially duty-free subheadings are taken into account on a <i>pro rata</i> basis if tariff line imports are not available.
	Value in %	Share of duty-free trade in per cent of all bilateral trade flows; includes duty-free preferential treatment. Partially duty-free subheadings are taken into account on a <i>pro rata</i> basis if tariff line imports are not available.

Definition of groups used in part A.2

Product Group	MTN ¹	Harmonized System nomenclature 2022
Agricultural products (Ag)

III. Non-tariff measures

1. Introduction	201
2. Statistics on some selected non-tariff measures	203
2.1 Final measures by importing/exporting country/territory	203
2.2 Final measures by product groups	213
2.3 Final measures of the 20 most frequently affected HS headings or HS chapters	214

1. Introduction

Non-tariff measures (NTMs) are becoming more and more relevant in their influence on global trade patterns as the reductions in tariff rates over several rounds of multilateral tariff negotiations have diminished the impact of tariffs. There is no officially agreed definition of NTMs. However, a widely accepted definition is the one from the Group of Eminent Persons on Non-Tariff Barriers: “NTMs are policy measures, other than [ordinary] customs tariffs, that can potentially have an economic effect on international trade in goods, changing quantities traded, or prices or both”.¹

The definition of NTMs does not judge legitimacy, adequacy, necessity or the discriminatory nature of any form of policy intervention. Furthermore,

the concept of NTMs is neutral and does not imply a negative or positive impact on trade. The existence of a NTM on a specific product in a given country per se, vis-à-vis non-existence of NTM in another country, would not mean the former has a more restrictive trade regime. It would depend on the nature, substance and application of the measure.

Some NTMs might have a positive impact no trade, though many NTMs are thought to have important restrictive and/or distortionary effects on international trade regardless of whether they are applied with protectionist intent or to address important non-trade objectives. NTMs include technical requirements in the area of Sanitary and Phytosanitary

(SPS) measures and Technical Barriers to Trade (TBT) that intend to protect health or safety, or provide environmental protection.

A NTM is a mandatory requirement enacted by an official law or regulation. Voluntary measures or private or voluntary standards are not included. Thus, international standards, such as ISO or Codex Alimentarius standards, are not considered a NTM unless adopted and made part of the national legislation in a country. Procedural obstacles to trade, i.e. practical challenges and processes that make compliance with the measures difficult, are also not considered as NTMs per se. Procedural obstacles are issues related to the process of application of a NTM, rather than the measure itself.

1.1 Anti-dumping

When a company exports a product at a price lower than the price it normally charges in its own home market, it is said to be “dumping” the product. The normal value is generally the price of the product at issue, in the ordinary course of trade, when destined for consumption in the exporting country market.² The WTO Agreement does not regulate the actions of companies engaged in “dumping”. Its focus is on how governments can or cannot react to dumping – it disciplines anti-dumping actions.

Data on anti-dumping (AD) measures drawn from WTO members’ notifications are available in the Integrated Trade Intelligence Portal and are the basis for the data shown here.³ Some notifications lack detailed information about product classifications according

to the Harmonized System (HS) nomenclature. Missing HS coding information was complemented from the Global Antidumping Database (GAD) which is part of the World Bank’s Temporary Trade Barriers Database.⁴ The GAD database is freely available and has detailed information about anti-dumping investigations and measures by country. The use of the data for this publication was kindly authorized by the author of the database. The merged data are available in the UNCTAD TRAINS database.⁵

The following tables show systematically the measure count for both the WTO member imposing the measures and the trading partner affected by the measures. It is worth noting that AD measures are also applied on exports from some countries

currently acceding to the WTO and others that are not WTO members.

Table 2.1.1 gives an overview of the (stock of) measures in effect as of 31 December 2022. It indicates the product coverage in terms of HS-6 digit codes. It also lists by WTO member how many new investigations have been initiated, how many final measures have been put into effect and how many measures were withdrawn. Tables 2.2.1 and 2.3.1 show more specifically which product groups have been subject to final AD measures.⁶ In Table 2.2.1 the product categories follow the groupings used in this publication in Part A2 of the tariff profiles whereas in Table 2.3.1 more detailed HS 4-digit headings are used to show in detail which products are most frequently subject to final AD measures.

1.2 Countervailing measures

Dumping and subsidies – together with anti-dumping (AD) measures and countervailing duties (CVD) – share a number of similarities. The reaction to dumping and subsidies is often a special offsetting import tax (countervailing duty in the case of a subsidy). This is charged on products from specific countries and therefore it breaks the GATT principles of binding a tariff and treating trading partners equally (MFN). The agreements provide an escape clause, but they both also say that before imposing a duty, the importing country must conduct a detailed investigation that shows that domestic industry is hurt. But there are also fundamental differences, and these are reflected in the agreements.

Dumping is an action by a company. With subsidies, it is the government or a government agency that acts, either by paying out subsidies directly or by requiring companies to subsidize certain customers. Countervailing duty (the parallel of anti-dumping duty) can only be charged after the importing country has conducted a detailed investigation similar to that required for anti-dumping action.⁷ Data on countervailing (CVD) measures drawn from WTO members' notifications are available in the Integrated Trade Intelligence Portal and are the basis for the data shown here.⁸

Table 2.1.2 gives an overview of the (stock of) measures in effect as of 31 December 2022. It indicates the product coverage in terms of HS-6 digit codes. It also lists by country how many new investigations have been initiated, how many final measures have been put into effect and how many measures were withdrawn. Tables 2.2.1 and 2.3.2 show more specifically which product groups have been subject to final CVD measures.⁹ In Table 2.2.1 the product categories follow the groupings used in this publication in Part A.2 of the tariff profiles whereas in Table 2.3.2 more detailed HS 4-digit headings are used to show in detail which products are most frequently subject to final CVD measures.

1.3 Safeguards

A WTO member may restrict imports of a product temporarily (take "safeguard" actions) if its domestic industry is injured or threatened with injury caused by a surge in imports. Here, the injury has to be serious. An import "surge" justifying safeguard action can be a real increase in imports (an absolute increase); or it can be an increase in the imports' share of a shrinking market, even if the import quantity has not increased (relative increase). Industries or companies may request safeguard action by their government.

After a proper investigation, a government can, if the necessary conditions as above are met, restrict imports of the product from all sources (but not from a specific member or group of members). This means that,

for example, if there were 5 countries exporting a specific product into a country, and that country imposed a safeguard measure on this product, this safeguard measure affects five countries. In this sense, care should be taken when comparing the number of measures in, for example anti-dumping, where one anti-dumping measure affects only one exporting country.

The WTO agreement sets out requirements for safeguard investigations by national authorities. The emphasis is on transparency and on following established rules and practices – avoiding arbitrary methods.¹⁰ Data on safeguard actions drawn from WTO members' notifications are available in the Integrated Trade Intelligence Portal and are the basis for the data shown here.¹¹

Table 2.1.3 gives an overview of the (stock of) measures in effect as of 31 December 2022. It indicates the product coverage in terms of HS-6 digit codes. It also lists by country how many new investigations have been initiated and how many final measures have been put into effect. Tables 2.2.1 and 2.3.3 show more specifically which product groups have been subject to final Safeguard measures.¹² In table 2.2.1 the product categories follow the groupings used in this publication in Part A.2 of the tariff profiles whereas in table 2.3.3 more detailed HS chapters are used to show in detail which particular products are most frequently subject to final safeguard measures.

2. Statistics on some selected non-tariff measures

2.1 Final Measures by importing/exporting country/territory

2.1.1 Anti-dumping measures in effect in 2022

Description of column headings

Country/Territory			Name of importing/exporting country/territory	
Actions taken as importer	From 1 January to 31 December 2022	Investigations initiated		Number of investigations initiated by the country as importer in 2022
		Final measures	Implemented	Number of final measures implemented by the country as importer in 2022
			Withdrawn/Revoked	Number of final measures withdrawn or revoked by the country as importer in 2022
	As of 31 December 2022	Final measures in effect	Number of measures	Number of final measures in effect on products imported by the country as of 31 December 2022
			Products covered (Number of HS 6-digit)	Number of distinct HS 6-digit subheadings covered (fully or partially) by products on which final measures by the importing country were in force as of 31 December 2022
	Actions faced as exporter	From 1 January to 31 December 2022	Investigations initiated	
Final measures			Implemented	Number of final measures implemented on products exported by the country in 2022
			Withdrawn/Revoked	Number of final measures on products exported by the country withdrawn or revoked in 2022
As of 31 December 2022		Final measures in effect	Number of measures	Number of final measures in effect on products exported by the country as of 31 December 2022
			Products covered (Number of HS 6-digit)	Number of distinct HS 6-digit subheadings covered (fully or partially) by products on which the country as exporter is subject to final measures as of 31 December 2022

Note:

All members submitting semi-annual reports of anti-dumping actions are listed individually. Where listed members take action on a customs-union-wide basis, the figures on numbers of actions are shown for the WTO member in which the investigating authority is physically located. As indicated below, to avoid multiple-counting, the rows for the other reporting customs union members are left blank.

2.3 Final measures of the 20 most frequently affected HS headings or HS chapters

2.3.1 Anti-dumping final measures in effect as of 31 December 2022 – ranked list of the 20 most frequently affected HS headings

Description of column headings

Product group/HS Heading description	These are product groups of the Harmonized System at the HS 4-digit Heading level. They are ranked according to the number of total final measures in effect
Total number of measures	Total number of final measures affecting products in a given HS Heading

Product group/HS heading description	HS 4-digit Code	Total number of Anti-Dumping measures
Flat-rolled products of alloy steel other than stainless, of a width of ≥ 600 mm, hot-rolled or cold-rolled "cold-reduced"	7225	156
Flat-rolled products of iron or non-alloy steel, of a width ≥ 600 mm, hot-rolled, not clad, plated or coated	7208	115
Flat-rolled products of iron or non-alloy steel, of a width ≥ 600 mm, hot-rolled or cold-rolled "cold-reduced", clad, plated or coated	7210	111
Flat-rolled products of alloy steel other than stainless, of a width of < 600 mm, hot-rolled or cold-rolled "cold-reduced"	7226	110
Tubes, pipes and hollow profiles "e.g., open seam or welded, riveted or similarly closed", of iron or steel (excl. of cast iron, seamless tubes and pipes and tubes having internal and external circular cross-sections and an external diameter of $> 406,4$ mm)	7306	99
Flat-rolled products of iron or non-alloy steel, of a width of < 600 mm, hot-rolled or cold-rolled "cold-reduced", not clad, plated or coated	7211	97
Flat-rolled products of iron or non-alloy steel, of a width of < 600 mm, hot-rolled or cold-rolled "cold-reduced", clad, plated or coated	7212	91
Tubes, pipes and hollow profiles, seamless, of iron or steel (excl. products of cast iron)	7304	68
Bars and rods, of iron or non-alloy steel, not further worked than forged, hot-rolled, hot-drawn or hot-extruded, but incl. those twisted after rolling (excl. in irregularly wound coils)	7214	67
Bars and rods of iron or non-alloy steel, hot-rolled, in irregularly wound coils	7213	60
Other bars and rods of alloy steel other than stainless, angles, shapes and sections of alloy steel other than stainless, n.e.s.; hollow drill bars and rods, of alloy or non-alloy steel	7228	55
Bars and rods of alloy steel other than stainless, hot-rolled, in irregularly wound coils	7227	54
Flat-rolled products of stainless steel, of a width of ≥ 600 mm, hot-rolled or cold-rolled "cold-reduced"	7219	47
Plates, sheets, film, foil and strip, of non-cellular plastics, not reinforced, laminated, supported or similarly combined with other materials, without backing, unworked or merely surface-worked or merely cut into squares or rectangles (excl. self-adhesive products, and floor, wall and ceiling coverings of heading 3918)	3920	45
New pneumatic tyres, of rubber	4011	45
Flat-rolled products of iron or non-alloy steel, of a width of ≥ 600 mm, cold-rolled "cold-reduced", not clad, plated or coated	7209	44
Tube or pipe fittings "e.g. couplings, elbows, sleeves", of iron or steel	7307	42
Flat-rolled products of stainless steel, of a width of < 600 mm, hot-rolled or cold-rolled "cold-reduced"	7220	40
Stranded wire, ropes, cables, plaited bands, slings and the like, of iron or steel (excl. electrically insulated products and twisted fencing wire and barbed wire)	7312	40
Bars and rods, of iron or non-alloy steel, cold-formed or cold-finished, whether or not further worked, or hot-formed and further worked, n.e.s.	7215	38

2.3.2 Countervailing final measures in effect as of 31 December 2022 – ranked list of the 20 most frequently affected HS headings

Description of column headings

Product group/HS Heading description	These are product groups of the Harmonized System at the HS 4-digit Heading level. They are ranked according to the number of total final measures in effect
Total number of measures	Total number of final measures affecting products in a given HS Heading

Product group/HS heading description	HS 4-digit Code	Total number of Countervailing measures
Flat-rolled products of alloy steel other than stainless, of a width of ≥ 600 mm, hot-rolled or cold-rolled "cold-reduced"	7225	32
Flat-rolled products of alloy steel other than stainless, of a width of < 600 mm, hot-rolled or cold-rolled "cold-reduced"	7226	28
Flat-rolled products of iron or non-alloy steel, of a width ≥ 600 mm, hot-rolled or cold-rolled "cold-reduced", clad, plated or coated	7210	24
Flat-rolled products of iron or non-alloy steel, of a width of < 600 mm, hot-rolled or cold-rolled "cold-reduced", clad, plated or coated	7212	24
Tubes, pipes and hollow profiles "e.g., open seam or welded, riveted or similarly closed", of iron or steel (excl. of cast iron, seamless tubes and pipes and tubes having internal and external circular cross-sections and an external diameter of $> 406,4$ mm)	7306	24
Flat-rolled products of iron or non-alloy steel, of a width of < 600 mm, hot-rolled or cold-rolled "cold-reduced", not clad, plated or coated	7211	20
Flat-rolled products of iron or non-alloy steel, of a width ≥ 600 mm, hot-rolled, not clad, plated or coated	7208	14
Tubes, pipes and hollow profiles, seamless, of iron or steel (excl. products of cast iron)	7304	14
Tubes and pipes, having circular cross-sections and an external diameter of $> 406,4$ mm, of flat-rolled products of iron or steel "e.g., welded, riveted or similarly closed"	7305	12
Bars and rods, of iron or non-alloy steel, cold-formed or cold-finished, whether or not further worked, or hot-formed and further worked, n.e.s.	7215	11
Other bars and rods of alloy steel other than stainless, angles, shapes and sections of alloy steel other than stainless, n.e.s.; hollow drill bars and rods, of alloy or non-alloy steel	7228	11
Structures and parts of structures "e.g., bridges and bridge-sections, lock-gates, towers, lattice masts, roofs, roofing frameworks, doors and windows and their frames and thresholds for doors, shutters, balustrades, pillars and columns", of iron or steel; plates, rods, angles, shapes, sections, tubes and the like, prepared for use in structures, of iron or steel (excl. prefabricated buildings of heading 9406)	7308	9
Articles of iron or steel, n.e.s. (excl. cast articles)	7326	9
New pneumatic tyres, of rubber	4011	8
Flat-rolled products of stainless steel, of a width of ≥ 600 mm, hot-rolled or cold-rolled "cold-reduced"	7219	8
Flat-rolled products of stainless steel, of a width of < 600 mm, hot-rolled or cold-rolled "cold-reduced"	7220	8
Wire of alloy steel other than stainless, in coils (excl. bars and rods)	7229	8
Flat-rolled products of iron or non-alloy steel, of a width of ≥ 600 mm, cold-rolled "cold-reduced", not clad, plated or coated	7209	7
Bars and rods of iron or non-alloy steel, hot-rolled, in irregularly wound coils	7213	7
Bars and rods, of iron or non-alloy steel, not further worked than forged, hot-rolled, hot-drawn or hot-extruded, but incl. those twisted after rolling (excl. in irregularly wound coils)	7214	7

2.3.3 Safeguard final measures in effect as of 31 December 2022 – ranked list of the 20 most frequently affected HS Chapters

Description of column headings

Product group/HS chapter description	These are product groups of the Harmonized System at the HS 2-digit chapter level. They are ranked according to the number of total final measures in effect
Total number of measures	Total number of final measures affecting products in a given HS chapter

Product group/HS heading description	HS 2-digit Code	Total number of Safeguard measures
Iron and steel	72	292
Articles of apparel and clothing accessories, not knitted or crocheted	62	71
Articles of apparel and clothing accessories, knitted or crocheted	61	61
Articles of iron or steel	73	40
Man-made staple fibres	55	37
Man-made filaments; strip and the like of man-made textile materials	54	27
Cotton	52	26
Carpets and other textile floor coverings	57	22
Knitted or crocheted fabrics	60	18
Other made-up textile articles; sets; worn clothing and worn textile articles; rags	63	13
Plastics and articles thereof	39	6
Special woven fabrics; tufted textile fabrics; lace; tapestries; trimmings; embroidery	58	5
Preparations of cereals, flour, starch or milk; pastrycooks' products	19	4
Soap, organic surface-active agents, washing preparations, lubricating preparations, artificial waxes, prepared waxes, polishing or scouring preparations, candles and similar articles, modelling pastes, 'dental waxes' and dental preparations with a basis of plaster	34	4
Paper and paperboard; articles of paper pulp, of paper or of paperboard	48	4
Nuclear reactors, boilers, machinery and mechanical appliances; parts thereof	84	4
Electrical machinery and equipment and parts thereof; sound recorders and reproducers, television image and sound recorders and reproducers, and parts and accessories of such articles	85	4
Ceramic products	69	3
Aluminium and articles thereof	76	3
Sugars and sugar confectionery	17	2

1. The evolution of market access over 16 years of “World Tariff Profiles”

Transparency is a major principle of the multilateral trading system, with the WTO as well as ITC and UNCTAD promoting transparency through various mechanisms and provisions. A key element of transparency, tariff data, has been collected and published since the early 1970s. Since 2006, “World Tariff Profiles” has reported annually on tariff data for countries and customs territories, now totalling more than 170, and for product groups.

Analysing the evolution of tariff policies since the first edition of “World Tariff Profiles” up to 2021, as outlined below, gives insights into the trends of applied and bound tariffs across various groups broken down by development status and region and across product groups.¹

Trade opening in terms of most-favoured nation (MFN) tariffs – i.e. a non-discriminatory tariff – has been largely modest over this 16-year period following significant trade opening from 1995 to 2005 during implementation of the WTO’s founding Marrakesh Agreement. The share of duty-free products and tariff peaks also saw modest liberalization between 2006 and 2021.

The average MFN tariff for all products declined from 10.1 per cent in 2006 to 8.9 per cent in 2021 (see Figure 1). This modest decline can be attributed to the fact that significant tariff reduction resulting from the Uruguay Round and some other unilateral decisions had already been implemented. These actions had resulted in about a 32 per cent reduction in the MFN applied tariff by WTO members between 1996 and 2005.²

Tariffs for agriculture and non-agriculture products both declined, with a slightly larger reduction in non-agriculture tariffs. The trend has been constant, with decreasing average tariffs almost every year, indicating progress towards a more open and interconnected global economy. The level of tariffs applied for agriculture products is higher than for non-agriculture products. In 2021, the average MFN

tariff for agriculture products was 14.8 per cent compared to 8.0 per cent for non-agriculture products.

Bound tariffs – the maximum MFN tariff level for a particular product – have remained almost unchanged from 2006 to 2021. The bound rates are significantly higher than the MFN tariff rates (see Table 1) that are actually applied. On average, bound rates are more than three times higher than applied tariff rates. For example, in agriculture, the global average bound rate is 54.4 per cent whereas the global average MFN applied rate is 14.8 per cent. The ceiling levels for bound tariffs in many developing economies contribute to this difference as some have very high ceilings, e.g. around 100 per cent.

Countries and customs territories decide unilaterally to reduce their MFN tariffs for economic and social reasons – for example, to have access to low-cost, high-quality food and other products. They often want to keep bound rates higher to maintain “policy space”, allowing them the opportunity to increase the applied rates in the future if they wish.

The MFN applied tariffs have declined in developed, developing and least-developed economies (see Figure 2). Developed economies started from the lowest base in 2006 (6.9 per cent) and have also had the sharpest decline, falling to 5.2 per cent in 2021. Developing and least-developed economies have maintained somewhat higher MFN tariffs, on average 8.7 per cent and 12.1 per cent respectively in 2021. There are many reasons for this, including a

dependence on tariff revenue for some developing and least-developed economies. It would be beneficial for the global economy to see developing and least-developed economies further reduce their tariffs and further integrate into the global economy, taking into account their particular challenges.

Applied MFN tariffs vary significantly by region, with Africa having the highest average applied tariffs at almost 12.4 per cent, and Europe and Oceania having the lowest at 5.4 per cent and 6.2 per cent respectively in 2021 (see Figure 3). The data also reveals that average applied tariffs in Europe and Oceania have experienced the largest decline of all regions, with a reduction of 30 per cent and 28 per cent respectively from their initial levels in 2006. In contrast, Africa and the Americas have seen little change in their applied tariffs over this period, with reductions of around 5 per cent in 16 years.

In all product group and development status combinations, there has been a relatively similar modest decline in MFN tariffs over time (see Figure 4), with the exception of agriculture in least-developed countries (LDCs). The applied MFN tariffs in agriculture in developed economies have remained relatively high. They have only been surpassed by the tariffs of LDCs in the same product group in 2015. The fluctuation of agriculture tariffs in developed economies is due to these being estimated at ad valorem equivalent of specific tariffs (AVEs). The computation of AVEs is based on unit values of traded products, which tend to fluctuate considerably over time.

Table 1: Average bound and MFN applied tariff rates for product groups, 2021

	Bound	MFN applied
Agriculture	54.4	14.8
Non-agriculture	27.6	8.0
All	37.4	8.9

Figure 1. Applied MFN average tariffs (simple average in per cent)

Figure 2. Applied MFN average tariffs by development status (per cent)

Figure 3. Applied MFN average tariffs by region (per cent)

The differences between the averages of the various development status groups for non-agricultural tariffs is much higher than for agriculture at the end of the 16-year period. For

instance, in 2021, there was less than a 3 percentage points difference between the highest and the lowest regions for tariffs in agriculture whereas there was an 8 percentage

point difference between the average tariffs for developed economies and LDCs in non-agricultural products.

Figure 4. Applied MFN average tariffs by product groups and development status

1.1 Share of MFN duty free tariff lines

The share of MFN duty-free products also indicates the degree of trade opening. Duty-free tariff lines can reduce trade costs beyond the fact that no tariffs need to be paid since they can also reduce administrative costs. This can have particularly positive implications for LDCs, which are often affected by high fixed costs for relatively small volumes.

The share of duty-free tariff lines has been increasing steadily for agriculture and non-agriculture products (see Figure 5). Agriculture products have a lower share of duty-free products and have also been liberalized less compared to non-agriculture products.

Between 2006 and 2021, the share of duty-free non-agriculture products increased by more than 7 percentage points while the share of duty-free agriculture products increased by less than 4 percentage points.

The share of duty-free products has gradually increased in all regions although the shares in 2021 vary significantly (see Figure 6). Africa has the lowest share of duty-free products, followed by the Americas and Asia. In Africa, only about one product in five is duty-free. Europe and Oceania have the highest share of duty-free products, approximately one-third.

By geographical region and product group, agriculture in Oceania and non-agriculture products in Europe have the highest share of MFN duty-free lines (see Figure 7). Europe also experienced the highest level of liberalization over time, with over 40 per cent of products currently duty-free. Significant liberalization also took place in non-agriculture products in the Americas, where duty-free coverage increased by nearly 10 percentage points over the 16 years. Conversely, in agriculture, the Americas and Africa eliminated tariffs on more products than Europe, albeit from a lower base.

Figure 5. Share of MFN duty-free products (per cent)

Figure 6. Share of duty-free products (all) by region (per cent)

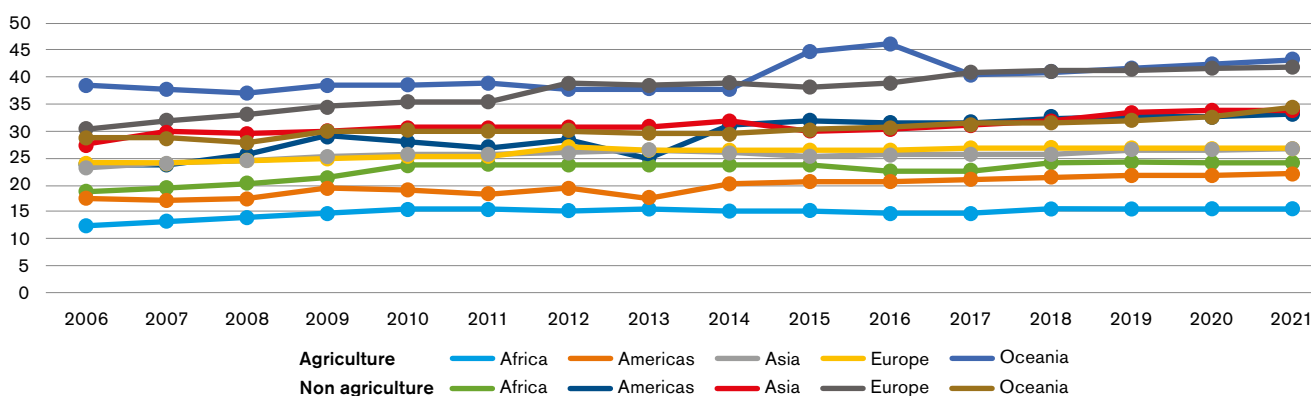

Figure 7. Share of duty-free products by region and by group (per cent)

1.2 Tariff peaks

Tariff peaks are high tariffs that are used for so-called sensitive products. They can significantly distort trade. A reduction in the number of tariff peaks combined with stable average tariffs would reduce trade distortions. International tariff peaks are those tariffs exceeding 15 per cent and domestic peaks are those three times higher than the national average. The

number of international tariff peaks decreased in all three development status groups (see Figure 8), indicating a modest reduction in MFN tariffs. LDCs have the highest share of international peaks while developed economies have the lowest.

A relatively high number of domestic peaks indicates a high dispersion of

national tariff levels and not necessarily a high (average) national tariff level. Developed economies, for example, have a high share of domestic peaks and relatively low average tariffs or shares of international peaks. LDCs, on the other hand, have the lowest share of domestic peaks (see Figure 9) but many international peaks and relatively high average MFN tariffs.

Figure 8. Share of international peaks by development status (per cent)

Figure 9. Share of domestic peaks by development status (per cent)

1.3 Maximum tariffs

A high maximum tariff is an indication of one or more very sensitive sectors. Tariffs can be prohibitively high, preventing all imports. Developed

economies have the highest maximum tariffs, above 300 per cent over the 16-year period, and LDCs the lowest, below 100 per cent (see Figure 10).

Developing economies fall between these two groups. Maximum tariffs are often AVE estimates and vary with the unit values of the products.

Figure 10. Average maximum duty by development status (per cent)

1.4 Trade opening patterns

The reduction in average MFN applied tariffs (see Figure 1) and the decrease in the average share of tariff peaks (see Figure 8) both point to modest trade opening for WTO members as a whole. Figure 11 shows the change in the national average MFN tariff in per cent and the change in the national share of international tariff peaks for all 130 economies covered in this study for agriculture products.

The majority of countries and customs territories in the bottom left quarter reduced both their national average

tariff and the share of their peaks. A second group (top right) raised both the national average MFN tariff and the share of their peaks. Only very few members increased one category and decreased the other. For example, one member reduced its average MFN tariff by about 20 per cent while keeping the share of its tariff peaks constant.

Several LDCs increased both the average MFN tariff rates and the share of international peaks. Developed economies often reduced the average MFN tariff rates more significantly than

they reduced their share of tariff peaks. Most economies are very close to the zero line, meaning only small changes in agriculture products over the 16 years.

The pattern for non-agriculture products is similar (see Figure 12). However, more economies reduced both their average MFN tariff and their share of tariff peaks, at least marginally.

Figure 13 depicts economies in four categories: those that increased or decreased tariffs in both agriculture and non-agriculture sectors between 2006 and 2021.

There have been more instances where non-agriculture (mainly manufacturing) tariffs were reduced (left quadrants). This is evident not only in the higher number of economies liberalizing manufacturing (84 economies) compared to agriculture (64 economies) but also in the number of economies that liberalized manufacturing while increasing agricultural tariffs (26 economies). In contrast, only six economies increased their manufacturing MFN tariff while decreasing agriculture tariffs (bottom right quadrant).

In conclusion, the analysis of data published in the World Tariff Profiles over 16 years reveals some important trends in market access. The overall trend is modest trade opening across all indicators. MFN tariffs have declined, the share of MFN duty-free tariff lines has increased, the share of international tariff peaks has decreased and the maximum bound tariff has declined. This indicates some progress towards a more open and interconnected global economy. However, the reduction in MFN tariffs was less significant than that from 1995 to 2005, following the implementation of the WTO's Marrakesh Agreement at the end of the Uruguay Round.

Agriculture products have higher tariff levels compared to non-agriculture products, both in terms of MFN and bound tariffs. Bound tariffs have remained significantly higher than applied MFN tariffs. Furthermore, agriculture products have a lower share of duty-free products and have been liberalized less compared to non-agriculture products.

The analysis also highlights regional variations. Africa has the highest average applied tariffs while Europe and Oceania have the lowest. Europe and Oceania have experienced the largest declines in tariffs while Africa and the Americas have seen little change in their applied tariffs. Tariff peaks have decreased in all groups in terms of development status. Developed economies have the lowest share of tariff peaks while LDCs have the highest. On the other hand, developed economies have the highest maximum tariff levels while LDCs have the lowest. The overall observation is that trade opening is being pursued by a majority of economies, with just some exceptions.

2. Product classification for WTO trade statistics and policy analysis – Multilateral Trade Negotiations (MTN) Categories

2.1 Overview

The WTO's Multilateral Trade Negotiations (MTN) Categories is the product classification system used by the WTO for trade statistics and policy analysis. The system allows trade negotiators, policy makers and researchers to use common terminology to interpret trade trends and to analyse policy measures, such as tariffs, for various products.

The MTN Categories consist of broad product groups defined according to the Harmonized Commodity Description and Coding System (HS or Harmonized System) used for traded goods. The categories were initially established during the Tokyo Round in the mid-1970s and were employed in particular in the Uruguay Round multilateral trade negotiations.¹

Since then, they have become an indispensable tool for analytical work at the WTO. The categories facilitate the evaluation of trade negotiation outcomes, analysis of changes in tariffs and other trade-related policies, and the compilation of trade statistics across various economic sectors. They are commonly used in WTO publications and documents.

2.2 Background

Tokyo Round

The origins of the MTN Categories can be traced back to a report published in January 1980 by the Director-General of the General Agreement on Tariffs and Trade (GATT), which outlined the outcomes of the Tokyo Round trade negotiations (1973-79).² The report presented the negotiated tariff reductions across ten industrial product categories:

- Wood, pulp, paper, and furniture
- Textiles and clothing
- Leather, rubber, footwear and travel goods
- Base metals
- Chemicals (including photographic supplies)
- Transport equipment
- Non-electric machinery
- Electric machinery
- Mineral, precious stones and metals
- Manufactured articles n.e.s.

Uruguay Round

During the Uruguay Round (1986-94), the same ten industrial categories were used along with "fish and fish products" to review the outcomes of tariff reductions.³ Furthermore, ten agricultural product categories were added to the industrial categories.

- Fruit and vegetables
- Coffee, tea, cocoa, sugar, etc.
- Grains
- Animals and products thereof
- Oilseeds, fats and oils and their products
- Cut flowers, plants, vegetable materials; lacs, gums, etc.
- Beverages and spirits
- Dairy products
- Tobacco
- Other agricultural products

The industrial and agricultural product categories established during the Uruguay Round have been widely used in analyses of market access negotiations ever since. In 1993, the GATT Secretariat conducted a study on these product categories, identifying sectors where the export interests of developing economies were concentrated.⁴ The study also analyzed the average tariff reductions of developed economies, looking into imports from developing economies in each sector.

In December 1993, the Negotiating Group on Market Access published a review of proposed concessions by members, which presented a series of indicators calculated for each industrial and agricultural category.⁵ These categories were also used to evaluate the final outcomes of the Uruguay Round in 1994.⁶

Doha Round

The industrial and agricultural categories established during the Uruguay Round have continued to be the standard terms of reference for trade analysis by the WTO Secretariat. At the beginning of the Doha Round, they provided a framework to describe trade volume and tariff levels across various product sectors. This laid the foundation for further negotiations on trade opening.

In 2001, the WTO Secretariat published “Market Access: Unfinished Business,” which referred to these categories as the “Multilateral Trade Negotiations Agricultural/ Industrial Product Categories” and MTN Categories. Since then, several improvements have been made to these categories. One significant enhancement was the addition of “petroleum”⁷ to ensure comprehensive product coverage. Additionally, modifications were made to several agricultural categories to better reflect evolving trade patterns.⁸

2006 version

Since 2006, the MTN Categories have been the primary way to present trade flow statistics and tariff information in “World Tariff Profiles”. The 2006 version of the Categories introduced several adjustments to address emerging issues and to enhance accuracy.

Under agricultural products, a separate category was created for “cotton” while “cut flowers, plants, vegetable materials” were merged with “fruits and vegetables.” “Grains” were combined with “cereals”, and “other food preparations” and “spices” were moved to “other agricultural products.” For non-agricultural products, “metals” was merged with “mineral products and precious stones/metals”, and “textiles and clothing” were divided into two separate categories.

The 2006 version consists of a total of 22 categories. These adjustments have further enhanced the usefulness of the MTN Categories as a tool for analyzing international trade trends and patterns.

2023 version

In 2021, the WTO Secretariat initiated a project aimed at enhancing the MTN Categories, which resulted in the 2023 version. The review process led to the creation of a new two-level structure comprising 22 MTN Categories that closely resemble the previous categories. In addition, 72 MTN sub-categories were introduced to provide more detailed information, allowing for more precise analysis of trade patterns.

This updated structure allows for a more nuanced understanding of trade dynamics. The definition of MTN Categories and sub-categories has undergone careful examination and adjustment to ensure accurate representation of current trading patterns. Furthermore, a coding system has been introduced to enhance the usability of the categories and sub-categories, facilitating their use.

2.3 Structure

The MTN Categories play a vital role in the analysis of trade flows, tariffs and other trade policies. Their relatively simple structure aligns with broad economic sectors, providing a useful sector-based overview for trade policy discussions and negotiations. However, their limited level of detail can sometimes hinder their usefulness for broader purposes such as trade monitoring and product analysis.

To overcome this limitation, the introduction of sub-categories provides more detailed groupings where necessary. The first level consists of 22 categories, which are mostly identical to those in the 2006 version. Eighteen of these categories have been further divided into 68 sub-categories, providing a more refined level of analysis. To ensure completeness, the MTN Categories without subdivisions are repeated in the second level, resulting in a total of 72 sub-categories. This updated structure allows for a more detailed analysis, facilitating a nuanced understanding of trade patterns and policy impacts.

The new coding system for the MTN Categories utilizes letters from A to V while the MTN sub-categories incorporate a two-figure code as a suffix, resulting in a three-digit code that combines one letter and two figures. This coding system enhances the usability of the MTN Categories and sub-categories, allowing for easier analysis and comparison of trade policies and trends across various product sectors.

The definition of MTN Categories and sub-categories are based on the codes of chapters, headings or sub-headings in the Harmonized System. In the 2023 version, these categories and sub-categories align with HS 2022, as detailed below. The definition ensures that each six-digit HS code is assigned to only one sub-category and category. As a result, it avoids any overlap in HS coverage between MTN Categories and sub-categories, maintaining consistency in statistical calculations. For instance, the total trade value of all products is equal to the sum of the values of all MTN Categories (or sub-categories).

In addition to the Harmonized System (HS), other international product classifications such as the Standard International Trade Classification (SITC)⁹ and, to a lesser extent, the Central Product Classification (CPC)¹⁰ were used as general references during the development of the MTN Categories. These classifications provided additional guidance and insights for creating meaningful product groupings.

To ensure the significance of the sub-categories in terms of trade volume, each MTN sub-category has been carefully designed to encompass at least US\$ 6 billion of world imports annually. This threshold ensures that the sub-categories offer a sufficient level of detail while remaining relevant and valuable for analyzing international trade trends.¹¹

MTN categories and subcategories		
<i>MTN Category code</i> →	A	Live animals and meat ← <i>MTN category description</i>
	A01	Live animals, excluding fish
	A02	Meat, including preserved meat
	B	Dairy products
	B00	Dairy products
<i>MTN sub-category code</i> →	C	Fruits and vegetables
	C01	Fruits ← <i>MTN subcategory description</i>
	C02	Vegetables
	C03	Fruit and vegetable preparations
	D	Coffee, tea, cocoa and spices
	D01	Coffee, tea, mate
	D02	Cocoa and cocoa preparations
	D03	Spices
	E	Cereals and food preparations
	E01	Cereals
	E02	Food preparations.

2.4 Revisions and maintenance

The maintenance of the MTN Categories is carried out by the Economic Research and Statistics Division of the WTO Secretariat. To support time series analysis, a consistent correspondence between MTN Categories/sub-categories and the HS six-digit codes has been established for each version of the Harmonized System, such as HS1996, HS2002, HS2007, HS2012, HS2017 and future versions. This correspondence will continue to be updated with each new version of the HS.

The MTN Categories and sub-categories will be adjusted over time to reflect changes in merchandise trade patterns. This includes considering comments and suggestions received from relevant experts to ensure the relevance and accuracy of the classification. As international trade evolves, the MTN classification will be adapted accordingly to provide a reliable framework for trade analysis and policy evaluation.

The correlation table between the MTN Categories and the Harmonized System is available on the WTO website at <https://stats.wto.org/>.

Questions or other comments concerning the MTN Categories should be addressed to:

2.5 MTN Categories in HS2022

MTN Categories and subcategories		Harmonized System 2022
A	Live animals and meat	
A01	Live animals, excluding fish	Ch 01
A02	Meat	Ch 02 (except 0209), 1601, 1602; subheading 0410.10
B	Dairy products	
B00	Dairy products	Headings 0401-0406, 2105, 3501; subheading 3502.20
C	Fruits and vegetables	
C01	Fruits	Ch 08
C02	Vegetables	Ch 07
C03	Fruit and vegetable preparations	Ch 20 (except 2009), headings 1105, 1106, 1903, subheading 2103.20
D	Coffee, tea, cocoa and spices	
D01	Coffee, tea, mate	Headings 0901-0903, 2101
D02	Cocoa and cocoa preparations	Ch 18
D03	Spices	Ch 09 (except 0901-0903)
E	Cereals and food preparations	
E01	Cereals	Ch 10, 11 (except 1105, 1106)
E02	Food preparations	Ch 19 (except 1903), 21 (except 2101, 2105, 2103.20); heading 2209
F	Oilseeds, fats and oils	
F01	Oilseeds	Headings 1201-1207
F02	Animal fats and oils	Headings 0209, 1501-1506 (except 1504.10, 1504.20), 1518; subheadings 1516.10, 1521.90
F03	Vegetable fats and oils	Headings 1507-1517 (except 1516.10), 1520-1522 (except 1521.90)
G	Sugars and confectionery	
G00	Sugars and confectionery	Ch 17
H	Beverages and tobacco	
H01	Non-alcoholic beverages, including juices	Headings 2009, 2201, 2202
H02	Alcohols	Headings 2203-2208
H03	Tobacco and tobacco products	Ch 24 (except 2404.12, 2404.92, 2404.99)
I	Cotton, silk and wool	
I01	Cotton	Headings 5201-5203
I02	Silk and wool	Headings 5001-5003, 5101-5103, 5301, 5302
J	Other agricultural products	
J01	Plants, parts, extracts and vegetal materials	Ch 06, 13, 14, heading 1209-1214
J02	Chemicals from agricultural origin	Headings 3301, 3503-3505, 3823; subheadings 2905.43-2905.45, 3502.90, 3809.10, 3824.60
J03	Residues of food processing industry	Headings 1208, 2301-2309 (except 2301.20)
J04	Other products of animal origin	Ch 05 (except 0508.00, 0511.91); headings 0407-0410 (except 0410.10), 4101-4103, 4301; subheadings 3502.11, 3502.19
K	Fish and fish products	
K00	Fish and fish products	Ch 03, 16 (except 1601, 1602); heading 0508; subheadings 0511.91, 1504.10, 1504.20, 2301.20

MTN Categories and subcategories		Harmonized System 2022	
L	Minerals and metals		
	L01	Mineral fuels, other than petroleum oils	Ch 27 (except 2709, 2710, 2716)
	L02	Other minerals	Ch 25, 26
	L03	Non-metallic mineral products	Ch 68, 69, 70 (except 7019.11-7019.13, 7019.61, 7019.63-7019.69); headings 7102 (except 7102.39), 7104 (except 7104.91, 7104.99); subheading 7103.10
	L04	Jewellery and related products	Headings 7101, 7103 (except 7103.10), 7105, 7113-7117 (except 7115.10); subheadings 7102.39, 7104.91, 7104.99
	L05	Non-ferrous metals	Ch 74-81; headings 7106-7112
	L06	Iron and steel	Ch 72, 73 (excluding 7321, 7322)
	L07	Metal products	Ch 82, 83 (except 8304, 8305); heading 7118; subheading 7115.10
M	Petroleum		
	M01	Crude oils	Headings 2709
	M02	Petroleum oils, other than crude	Headings 2710
N	Chemicals		
	N01	Inorganic chemicals	Ch 28
	N02	Organic chemicals	Ch 29 (except 2905.43-2905.45, 2936, 2937, 2939, 2941)
	N03	Pharmaceuticals	Ch 30; headings 2936, 2937, 2939, 2941
	N04	Plastics	Ch 39
	N05	Fertilisers	Ch 31
	N09	Other chemical products	Ch 32, 33 (except 3301, 3306.20), 34 (except 3406), 36 (except 3605, 3606), 37, 38 (except 3809.10, 3823, 3824.60); headings 3506, 3507; subheadings 2404.12, 2404.92, 2404.99
O	Wood, paper, furniture		
	O01	Wood and wood products	Ch 44-46
	O02	Pulp, paper and printed matter	Ch 47-49
	O03	Furniture	9401-9404 (except 9402.90, 9404.30-9404.90)
P	Textiles		
	P01	Natural fibre, yarn and fabrics	Ch 50 (except 5001-5003), 51 (except 5101-5103), 52 (except 5201-5203), 53 (except 5301, 5302)
	P02	Man-made fibre, yarn and fabrics	Ch 54, 55
	P09	Other textile products	Ch 56-60, 63, 65 (except 6506, 6507); headings 6601, 8804; subheadings 3306.20, 4202.12, 4202.22, 4202.32, 4202.92, 7019.11-7019.13, 7019.61, 7019.63-7019.69, 9404.30-9404.90, 9612.10
Q	Clothing		
	Q00	Clothing	Ch 61, 62
R	Rubber, leather and footwear		
	R01	Rubber and rubber products	Ch 40
	R02	Leather and leather products	Ch 41 (except 4101-4103), 42 (except 4202.12, 4202.22, 4202.32, 4202.92, 4206.00), 43 (except 4301)
	R03	Footwear	Ch 64
S	Mechanical, office and computing machinery		
	S01	General industrial machinery	Headings 8405, 8413-8428 (except 8414.51, 8414.60, 8418.10-8418.40, 8419.11-8419.20, 8422.11, 8423.10), 8431 (except 8431.41-8431.49), 8467 (except 8467.21-8467.29), 8476, 8480-8484, 8487
	S02	Machinery for specialized industries	Headings 8429-8449 (except 8431.10-8431.39, 8443.31-8443.39, 8443.99), 8451-8466 (except 8451.21, 8452.10), 8468, 8472 (except 8472.90), 8474, 8475, 8477-8479, 8485, 8486; subheadings 8467.21-8467.29
	S03	Power generating machinery	Headings 8401, 8402, 8404, 8406-8412
	S04	Computers and office machinery	Headings 8470, 8471, 8473; subheadings 8443.31-8443.39, 8443.99, 8472.90, 8528.42, 8528.52, 8528.62

MTN Categories and subcategories		Harmonized System 2022
T	Electrical machinery and electronic equipment	
	T01	Electrical machinery Headings 8501-8507, 8511-8515, 8531, 8535-8539, 8540 (except 8540.11-8540.60), 8543-8549 (except 8544.70)
	T02	Electronic components Headings 8532-8534; subheading 8523.52
	T03	Semiconductors Headings 8541, 8542
	T04	Telecommunication equipment Headings 8517, 8518, 8524, 8526, 8529, 8530; subheading 8544.70
	T05	Audio-visual devices Headings 8519-8523 (except 8523.52), 8525, 8527, 8528 (except 8528.42, 8528.52, 8528.62); subheadings 8540.11-8540.60
	T06	Domestic appliances Headings 7321, 7322, 8403, 8450, 8508-8510, 8516; subheadings 8414.51, 8414.60, 8418.10-8418.40, 8419.11-8419.19, 8422.11, 8423.10, 8451.21, 8452.10
U	Transport equipment	
	U01	Motor vehicles Headings 8702-8708 (except 8707.90)
	U02	Railway vehicles Ch 86
	U03	Ships and floating structures Ch 89
	U04	Aircraft Ch 88 (except 8804)
	U05	Bicycles, motorcycles and other transport equipment Headings 8701, 8709, 8711-8714, 8716; subheading 8707.90
V	Other Manufactures	
	V01	Optical and photographic products Headings 9001-9013
	V02	Measuring instruments Headings 9014-9017, 9024-9033
	V03	Medical equipment Headings 9018-9022 (except 9022.19, 9022.29); subheadings 8419.20, 9402.90
	V04	Clocks and watches Ch 91
	V05	Arms and ammunition Ch 93; heading 8710
	V06	Recreational and sports products Ch 95
	V09	Other manufactures Ch 66 (except 6601), 67, 92, 96 (except 9612.10), 97, Headings 2716, 3406, 3605, 3606, 4206, 6506, 6507, 6602, 6603, 8304, 8305, 8715, 9023, 9405, 9406; subheading 9022.19, 9022.29

Endnotes

The evolution of market access over 16 years of "World Tariff Profiles"

1. The analysis is based on a complete series of 130 economies' data up to 2021, including data from World Tariff Profiles 2022. All figures presented are simple averages. Ad valorem equivalent tariffs of specific tariffs have been taken into account. Economies are classified into groups based on their development status and geographical regions following the UNCTAD definitions.
2. Source: WTO, ITC and UNCTAD databases.

Product classification for WTO trade statistics and policy analysis – Multilateral Trade Negotiations (MTN) Categories

1. Prior to the Harmonized System (HS), the MTN Categories were defined according to the Customs Cooperation Council Nomenclature (CCCN), the predecessor of the HS.
2. GATT – The Tokyo Round of Multilateral Trade Negotiations – Volume 2 – Supplementary Report -Geneva – January 1980.
3. Fish and fish products are treated as non-agricultural products according to the WTO Agreement on Agriculture.
4. An analysis of the proposed Uruguay Round agreement, with particular emphasis on aspects of interest to developing economies (MTN.TNC/W/122 and MTN.GNG/W/30, November 1993).
5. Negotiating Group on Market Access – Overall review and assessment of draft schedules of concessions (GATT 2683, December 1993).
6. GATT Secretariat, The results of the Uruguay Round of Multilateral Trade Negotiations (November 1994).
7. During the Tokyo Round, petroleum products were excluded from all calculations because it was considered that trade in this product was not affected by the duty levels.
8. The category "grains" was merged with "cereals and cereal preparations" while "animals and products thereof" was renamed as "meat and meat preparations"; a special category was created for "sugar and sugar confectionary", while "tobacco" does not exist anymore as a separate category.
9. <https://unstats.un.org/unsd/trade/sitcrev4.htm>
10. <https://unstats.un.org/unsd/classifications/Econ/cpc>
11. Based on the average annual imports in 2017-20.

V. Annexes

A. Data sources	234
B. Frequently asked questions	239

A. Data sources

The data was pooled from the following databases: WTO's Consolidated Tariff Schedules database (CTS) and Integrated Data Base (IDB) and ITC's MAcMap and TradeMap databases. Additional imports were sourced from the UN COMTRADE database when it has more updated data than WTO and ITC. The objective was to use for each country or customs territory the latest available information. For the summary tables and Part A of the tariff profiles, only applied tariffs for the years 2022 or 2021 and imports for 2021 or 2020 were retained. The

cut-off date for inclusion of new data in the publication was 30 April 2023.

For Part B in the tariff profiles more than 300 trade agreements with available data were included in the calculation of the preference margin and duty-free access. Some trade agreements that are currently in force have not been included for one or more of the following reasons: (1) the agreement – or the supplementary information to it – was not accessible (or the document was unworkable) at the time of the publication; (2) the data presented

some problems such as: missing product codes, the products codes of the agreement did not correspond to the product codes of the MFN tariffs of the country; or (3) the agreement entered into force after the country was uploaded in the Market Access Map database (in such cases the agreements will be included in the subsequent update of the database).

1. For some countries, the data for a country period shown in the table could not be used because the data was incomplete, inconsistent and in the case of trade statistics, without corresponding tariff data.

B. Frequently asked questions

How do you choose the countries to include in the publication?

In each issue, we include all WTO members and some countries or territories for which there is available data for applied tariffs for the reference years. Non-WTO members included in the publication can vary from issue to issue depending on the availability of data on applied tariffs for the reference years. WTO members are always included.

Why is there no applied MFN tariff for some WTO members?

Unlike data on bound tariffs which are sourced from legal documents at the WTO, applied tariffs are based on notification of the member to the WTO or from the tariff database of either the ITC or UNCTAD, the two other institutions collaborating with the WTO on this publication. For each issue of the WTP, we use two reference years for the applied MFN tariff, usually the most recent two years. For example, in the WTP 2023 issue, the data on applied tariffs used are for 2022 and if these are not available, we use 2021. If neither of those years is available from any of the tariff database of the three institutions, the statistics referring to applied tariffs are left blank.

Why is there no statistic on binding coverage for AG products?

During the Uruguay Round of tariff negotiations all members were supposed to have bound all their tariff lines for agricultural products, hence binding coverage for AG is assumed to be 100%.

How do you calculate the tariff average when there are non-*ad valorem* tariffs?

Whenever there is a non-*ad valorem* duty in a certain country schedule, it is converted to its *ad valorem* equivalent (AVE) to the extent possible. For the methodology used in calculating the AVE, please refer to Technical Annex B of World Tariff Profiles 2006. As a caveat though, some non-*ad valorem* duties are too complex and the calculation of the AVE requires additional data not readily available (e.g. duty expressed as “9 + EA max 18.7 + AD S/Z”). In such cases, the duty is not included in the calculation of the tariff indicators.

Why is the applied tariff average higher than the bound tariff average?

(Related to this is the case when the maximum applied tariff is higher than the maximum bound tariff.)

When the bound tariff is lower than the applied tariff, it implies a binding violation. However, this is not always true. The following cases show why even if the calculated applied statistics are higher than the corresponding bound statistics, it is possible that there was no binding violation.

- The binding coverage might be less than 100% and the applied duties for unbound products may be high thus affecting the average and the maximum duty. Please note that the bound tariff average is based only on tariff lines that are bound. The applied duty average is based on the full tariff schedule following a certain Harmonized System (HS) nomenclature version. Some WTO members who acceded during the Uruguay Round had not fully bound their entire tariff schedule.
- The WTO member has only recently acceded and the concessions are still not fully implemented. As the bound duty statistics presented in the WTP refer to the final bound duty at the end of the implementation period, the applied duties could still be higher than the bound duties.
- The bound and applied tariff schedules are in different HS versions. For each WTO member, the publication uses the approved or certified bound tariff data in the most recent HS version. For example, a member who joined during the Uruguay Round has its original bound tariff schedule in HS 1992. On the other hand, applied tariff is in the HS version used by the member which in practice is usually the most current version of the HS (say, HS 2017). In order for the bound tariff information to be more aligned with the applied tariffs, the schedule of concessions is regularly transposed or adapted to newer HS versions. However, all the other members have to agree to the new schedule in a different HS version to ensure that no change in the concessions happened during the transposition. This process of certifying a schedule in a more recent HS version often takes a long time. Hence, it is more often the case that the bound tariff schedule is in an older version of the HS compared to the one used for the applied tariff. The difference in HS versions is not expected to have changed any of the member's commitments but might have affected the aggregate statistics due to the differences in HS subheading breakdown between versions.
- The national tariff line breakdown might be different between the bound and applied tariff schedules even within the same HS version, which could have affected the calculated averages. In the simple example below, the applied tariff schedule was more detailed than that for bound tariff thus having an average higher than the bound tariff even if there's no binding violation.

Bound and applied Tariffs for HS 2017 subheading 0804.50

(Guavas, mangoes and mangosteens, fresh or dried)

Bound Tariff			Applied Tariff		
Code	Description	Duty (%)	Code	Description	Duty (%)
0804.50.10	Mangoes	10	0804.50.11	Mangoes, fresh	10
			0804.50.19	Mangoes, dried	9
0804.50.90	Guavas and mangosteens	5	0804.50.90	Guavas and mangosteens	5
	Average	7.5		Average	8

- The *ad valorem* equivalents (AVE) may affect the comparison between bound and applied duties when the changes in nomenclature have resulted in the use of different unit values. Please refer to Technical Annex B of World Tariff Profiles 2006 for the methodology on the AVE calculation.
- For some WTO members who have commitments on Other Duties and Charges (ODCs), the data available on applied tariffs may include the ODCs, and it is not possible to separate the ODC from the import duty.

Why is my calculation for simple tariff average of a country different from the one in the World Tariff Profiles?

- If there are non-*ad valorem* duties, the calculation of AVEs for the WTP might be different from the calculated AVEs from other sources.
- The WTP uses two-stage averaging. First, the average of all national tariff lines within the same HS six-digit subheading is calculated and then the mean of all HS subheading averages is taken. This is to minimize the variability caused by the different national tariff line breakdowns within the subheading. All reporters using the same HS version would have the same number of subheading (i.e., second stage) averages from which the country average or sectorial or product group average is calculated.

My country did not change its applied tariff rates from that of the previous year but why did the average change?

- If there are non-*ad valorem* duties, the calculated AVEs could have changed because new reference years for imports are used every issue.
- Even without non-*ad valorem* duties in a tariff schedule, it's possible that the breakdown changed for some reasons but the applied tariff rate for each product remained the same. Please see the example below on the average for HS subheading 0804.50 which changed because of the difference in the breakdown of tariff lines.

Year 1 Applied Tariff			Year 2 Applied Tariff		
Code	Description	Duty (%)	Code	Description	Duty (%)
0804.50.10	Mangoes	10	0804.50.11	Mangoes, fresh	10
			0804.50.19	Mangoes, dried	10
0804.50.90	Guavas and mangosteens	5	0804.50.90	Guavas and mangosteens	5
	Average	7.5		Average	8.3

Why are there maximum values that are italicized?

To differentiate between a maximum based on an *ad valorem* tariff and one based on an AVE, the value of which can vary depending on the unit value of the product for the reference period, the maximum value based on an AVE is italicized.

Why does the same year for applied tariff appear for two consecutive WTP issues?

For each issue of the WTP, we use two reference years for the applied MFN tariff, usually the most recent two years and select the latest year available. There is always a one-year overlap on the reference years for consecutive issues of the WTP. For example, for WTP 2023, the reference years for tariff are 2022 and 2021 and for WTP 2022, they are 2021 and 2020. If, during the preparation for WTP 2022, the 2021 data for Country X is already available, then 2021 data is used. However, if for WTP 2023 Country X has no available data yet for 2022 in any of the databases, the data for 2021 is re-used.

Why does the same year for applied tariff appear for two consecutive WTP issues but with different statistics?

The answer to why the same year appears for two consecutive WTP issues is in the previous question.

The reason why the statistics differ could be the presence of non-*ad valorem* duties in the tariff schedule. Different reference years on imports are used for the calculation of AVEs for each issue and hence the AVEs can change.

Another reason could be that the reporter itself revised the data previously submitted for the relevant year.

Why did the bound tariff statistics differ from the WTP issue of the previous year?

In theory, bound tariffs do not change unless there is a renegotiation of a Member's commitments. Hence, the most intuitive answer would be that the Member renegotiated some or even all of its commitments during the course of the year.

However, there could be other reasons why, even if there were no changes in the commitments, some aggregate statistics changed. One of these could be the presence of non-*ad valorem* duties in the bound tariff schedule. Different reference years on imports are used for the calculation of AVEs for each issue and hence the AVEs can change.

Another reason could be the use of an approved schedule in a more recent HS version. Please refer to the question "why is the applied tariff average higher than the bound tariff average?" for additional explanation.

My country imports mostly from partners with whom we have a free trade agreement and imports come in duty free. Why is the calculated trade weighted average much higher than what is expected?

The trade weighted average presented in Part A.1 of each tariff page is based on applied MFN duty weighted by total imports and does not take into consideration non-MFN duties (mostly preferential) applied to certain trading partners. In effect, this is the trade weighted average assuming all imports are levied the MFN rate.

In Part B, the statistics show that exports from my country to a certain partner (i.e. imports of the partner from my country) do not enjoy preference as reflected by the preferential margin and % duty free imports. However, in reality our exports enjoy preferential rates in this market. Why don't the statistics show this?

The market access statistics calculated in Part B require complete information on non-MFN tariff regimes which each market or importer applies to each of its import partners. However, there are non-MFN or other preferential tariff regimes which are not officially notified to the WTO nor are these available in the other tariff databases. The statistics are based only on non-MFN tariff regimes for each market for which we have data.

How can I get the EXCEL version of the tariff profiles and summary tables for previous WTP issues?

At present there is no online facility yet to extract these tables. However, these can be requested from the Market Access Intelligence Section of the WTO. Send your email request to mai@wto.org specifying which data years or WTP issues you are interested in.

Acknowledgements

Acknowledgements are due to all the data providers, mostly national administrations or WTO delegations who have made this information available including through notifications presented as a special topic. In a number of cases, data has been made available on national websites or through regional organizations. Given the vast amount of statistical data and metadata that needed to be processed, and because this information is not available in one single organization, this publication was only possible as a joint effort of the WTO, ITC, and UNCTAD. Each of the three organizations has a proven track record and comparative strengths in the field of tariff analysis.

The WTO, as the repository of its members' binding commitments on goods and also as repository for members' notifications in a number of trade policy areas, has been at the core of this undertaking. Trade and tariff data were sourced from either the WTO or ITC databases depending on which one had the most recent tariff or trade data for the years covered. In addition, the

ITC contributed all the AVE estimates and preferential duties. Missing trade data for some countries were also sourced from the UN Commodity Trade Statistics Database (COMTRADE).

The preparation of this publication was coordinated by Dayong Yu (WTO) in close collaboration with Mondher Mimouni (ITC) and Ralf Peters (UNCTAD). Janvier Usanase (WTO) was responsible for calculating the tariff indicators and generating the statistical tables. Jung-Ah Kang (WTO) worked on formatting and putting together all the different parts of the publication. Xavier Pichot (ITC) was in charge of providing the input dataset and of calculating the AVEs. At the ITC, thanks are also due to the data collection team coordinated by Karla Del Real Cañamar as well as to Dzmityr Kniahin and Mampiandra Antonia Ngavozafy for data processing.

For this edition's special topics, two technical papers were prepared: 1) "The evolution of market access over 16 years of World Tariff Profiles" from

Ralf Peters, Samuel Munyaneza, Denise Penello Rial, Rado Razafinombana and Alessandro Nicita at the UNCTAD, 2) "Product classification for WTO trade statistics and policy analysis – Multilateral Trade Negotiations (MTN) Categories" from Dayong Yu and Ng Shing Eric at the WTO.

Dayong Yu (WTO) and Mong Mun How (WTO) prepared the statistical tables on antidumping measures, countervailing duties and safeguard actions. Thanks are also due to Staff of the WTO Rules Division for their comments and suggestions for the technical annexes.

Finally, the contributions of the WTO Information and External Relations Division, specifically Serge Marin-Pache and Anthony Martin, and WTO printing facilities for the production and the French and Spanish translators in the Language Services and Documentation Division for rendering the publication in the WTO's other official languages are also hereby acknowledged.

If you would like more information on the contents of this report or if you have any comments or suggestions for improvement please contact the Market Access Intelligence Section (mai@wto.org).

World Tariff Profiles 2023 provides comprehensive information on the tariffs and non-tariff measures imposed by over 170 countries and customs territories. The publication starts with a breakdown of the tariffs imposed by these economies. Tariff data are presented in comparative tables and in one-page profiles for each economy. A summary table on selected indicators on the imports and exports profile for these economies is also presented. Statistics on non tariff measures by country and by product group complement the data on tariffs. Under the special topics part, there are two technical papers. The first one analyses the evolution of market access over 16 years of *World Tariff Profiles* and the second one focuses on Product classification for WTO trade statistics and policy analysis – Multilateral Trade Negotiations (MTN) Categories.

The publication is jointly prepared by the World Trade Organization, the United Nations Conference on Trade and Development (UNCTAD) and the International Trade Centre (ITC).
