

ITC MANAGEMENT RESPONSE

Evaluation of ITC's Ethical Fashion Initiative programme

Management Response, Action Plan, Results, and Means of Verification

Date of submission of final evaluation report: November 2024

Date of finalization of management response: February 2025

Responsible manager:	Chloe Mukai, Head ITC Ethical Fashion Initiative
Responsible chief:	Raimund Moser, Chief, Women Youth and Vulnerable Communities
Responsible director:	Dorothy Tembo, Acting Director, Division of Sustainable and Inclusive Trade
Head IEU:	Iván Touza Montero, ITC Independent Evaluation Unit (OIC)

Recommendation 1. Maximizing the EFI working model requires more compliance and better communication from EFI, with extended efforts to strategically work in a coordinated manner and increased dialogue with related ITC units.						
Operationally, this would require to:						
1.1. Establish stronger collaboration with the T4SD unit, discussing the ESG framework, and refraining from working in parallel on topics covered by ITC's relevant departments.						
1.2. Define and explain the concept of SE and business model better internally to ITC and to donors.						
1.3. Involve Kenya Country Manager and operational units in the design and implementation of programmes to a higher extent to discuss needs, shape the specific programmatic requirements and to avoid inefficiency issues.						
1.4. Increase coordination with different project teams; particularly with SheTrades, Refugees and Trade and ACP Business Friendly (Alliances for Action A4A); to discuss and explore possible areas of synergies/collaboration.						
Assigned to: EFI Management						
Management Response and Justification [if "Partially accepted" or "Rejected"]						
The recommendation is:	Accepted:	<input checked="" type="checkbox"/>	Partially accepted:	<input type="checkbox"/>	Rejected:	<input type="checkbox"/> [mark the relevant field with "X"]
Justification:	<i>Accepted and several measures have been initiated since 2014. The scope of collaboration will depend on the discussion and priorities of other technical teams. The collaboration with other initiatives and teams in Kenya will be further strengthened with the coming of the ITC regional office, headquartered in Nairobi.</i>					
Action points and responsibilities						
Action points ¹	Expected result/s and means of verification	Responsible office / partner	Contributing office(s) / partner(s)	Deadline [Month/Year]	Remarks	
1.1. EFI team to engage with T4SD team to share experiences and explore linkages related to the ESG framework.	Consultations and meetings and related outcomes	EFI & WYVC	T4SD	March 2025	Until now, EFI did not liaise w T4SD as the ESG system used by the initiative is very specific to the fashion industry and EFI project needs such as the artisanal value chains while the work of the T4SD tends to cover the bigger garment companies and retailers.	
1.2. EFI to prepare a write-up on the business model, made available for ITC.	Presentation / sharing of the model. Internal meeting such as section meetings, Divisional meetings or brownbag sessions.	EFI	All ITC	July 2025	Already carried out at least 10 of such meetings with SEC, OED, DCP, GIVC since the evaluation was launched.	
1.3. The CM to provide institutional support to promote EFI's activities and ensure proper	- CM to visit EFI premises in Kenya and understand how the EFI project operates.	OA	WYVC	December 2025	Communication and coordination needs to be improved in both directions.	

¹ For "Accepted" recommendations, action points should provide a comprehensive response to each recommendation and, if any, to sub-recommendations. For "Partially accepted" recommendations, action points should provide a substantive, coherent response. For "Rejected" recommendations, only justification text in the field above is necessary.

liaison with other ITC projects in Kenya.	<ul style="list-style-type: none"> - CM to organize institutional visits to relevant Kenyan authorities. - CM to support EFI in fundraising for new activities in Kenya - EFI Programme Manager to be part of ITC Country Team for Kenya 				
1.4 Explore possible synergies with SheTrades, A4A, Refugees and Trade and ACP Business Friendly	<ul style="list-style-type: none"> - Meetings, missions, and concept notes for joint initiatives / programs 	EFI	All teams	June 2025	Since 2024, new initiatives are being developed with SheTrades (including a collaboration with the MasterCard Foundation; Refugees & Trade (DonBosco partnership). The team explored a collaboration with A4A in Eswatini which was canceled by the donor as well linkages in the area of indigenous populations

Recommendation 2. Strive to stick to its mission on fashion to maintain sectoral coherence and refer identified opportunities in other sectors to other ITC units with more expertise. This would improve sectoral coherence at ITC by ensuring that units work with the most relevant value chains in line with their experience and mandates. Existing sectoral networks need to be maximized via efficient referral mechanisms between units. Senior Management Committee and SPPG Section have crucial roles in referrals and to encourage exchanges/experience sharing.

Assigned to: EFI Management

Management Response and Justification [if "Partially accepted" or "Rejected"]

The recommendation is:	Accepted:	X	Partially accepted:		Rejected:		[mark the relevant field with "X"]
Justification:	<i>Recommendation is accepted and implementation has already started in 2024. In the same vein, other teams are asked to ensure that all initiatives in the fashion sectors are coordinated or led by EFI.</i>						

Action points and responsibilities

Action points	Expected result/s and means of verification	Responsible office / partner	Contributing office(s) / partner(s)	Deadline [Month/Year]	Remarks
2.1 As recommended, EFI to focus on fashion and connect other ITC colleagues to possibilities in other sectors.	Project documents, SMC Minutes, NPP	WYVC	All ITC	The recommendation has been implemented with measures taken in 2024, i.e. transfer for OAH to the	<ol style="list-style-type: none"> 1. For the same reasons, projects and initiatives with fashion designers or in artisanal fashion production, especially those operating in countries where EFI is already working should be led and managed by EFI. 2. The B542 project also known as "EFI Culture Project" created the

				Youth and Trade Programme.	Opportunities are Here model, which was successful and is being implemented in new countries. This is a direct result credited to EFI which has also generated a remarkable new funding stream for ITC. Having the opportunity to experiment especially in other lifestyle sectors such as in this example can yield positive results.
--	--	--	--	----------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Recommendation 3. Explore further collaboration opportunities for potential projects with Don Bosco Institute in Burkina Faso and other Don Bosco institutions in other countries, particularly East and West Africa and Asia, and/or with new regional partnerships such as AfriLabs. This could be coordinated by the ITC Kenya Country Office once it is operational.

Operationally, this would require:

3.1. Initiate discussions with the Don Bosco Headquarters in Nairobi, and other potential donors, most importantly AICS.

3.2. Along with the efforts to diversify markets, partnerships with Don Bosco institutions in other countries (particularly Asia) can also be considered (DB has centres in 134 countries across six continents).

3.3. Other collaboration opportunities need to be explored with regional partners such as AfriLabs, to diversify partnerships.

Assigned to: EFI Management / WYVC Section

Management Response and Justification [if "Partially accepted" or "Rejected"]

The recommendation is:	Accepted:	<input type="checkbox"/>	Partially accepted:	<input checked="" type="checkbox"/>	Rejected:	<input type="checkbox"/>	[mark the relevant field with "X"]
Justification:	<i>Partially accepted. EFI is proactively expanding and deepening collaboration with funders and other partners. The scope and modalities of collaboration with implementing partners such as Don Bosco or Afrilabs is subject to mobilizing resources.</i>						

Action points and responsibilities

Action points	Expected result/s and means of verification	Responsible office / partner	Contributing office(s) / partner(s)	Deadline [Month/Year]	Remarks
3.1 Initiate and establish a relationship with Don Bosco HQ in Kenya and AICS. Explore collaborations with other Don Bosco branches.	Meetings held; follow up email for next steps shared; new projects / MoU developed if possible.	EFI	Refugees & Trade, Don Bosco	Completed	This is already taking place: EFI is in advanced conversations with AICS Burkina Faso and evaluating a joint training with DB in Kakuma in collaboration with Refugees and Trade.
3.2 Explore possibilities with DB in other geographies including Asia	Meetings held; follow up email for next steps shared; new projects / MoU developed in keeping with availability of funding / prospects.	EFI	Don Bosco, OAP	Sept 2025	EFI does not have the human resources to absorb exploratory activities. This recommendation can be further implemented with specific leads for

					financing and provision of related business development funds. Note: DB is a religious organization within the Catholic church hence may not be open to commercial partnerships.
3.3. Explore other collaborations	Meetings held; follow up email for next steps shared; new projects / MoU developed if possible.	EFI, SheTrades	Partners like DB	Sept 2025	Given its funding model, EFI will pursue exploratory outreach to new partners where and when tangible funding opportunities occur. WYVC has reached out to Afrilabs in the context of new programming Southern Africa that will include EFI.

Recommendation 4. It is recommended for the SEs to strategically consider production for the local and regional (Africa) markets as well as international, for a more regular and sustainable flow of work and income for the beneficiaries.

Operationally, this would require:

4.1 Market diversification needs to be considered via extending marketing efforts to other countries. EFI could guide these efforts with TEFI being a young SE still with limited marketing capacity. It is worth considering establishment of other SEs in Asia for the future, such as politically stable geographies of culturally rich textile traditions, with high income needs, target groups and funding opportunities to create employment for the vulnerable communities (such as Turkey or India).

4.2. EFI needs to encourage more links **between the SEs for client referrals and information sharing**. Preparing specific marketing tools (catalogues, digital information etc.) for all potential clients, demonstrating the complete set of products available from all regions in different segments and countries with product specifications would support marketing efforts in a holistic manner.

Assigned to: EFI Management / WYVC Section

Management Response and Justification [if "Partially accepted" or "Rejected"]

The recommendation is:	Accepted:	<input type="checkbox"/>	Partially accepted:	<input checked="" type="checkbox"/>	Rejected:	<input type="checkbox"/>	[mark the relevant field with "X"]
------------------------	-----------	--------------------------	---------------------	-------------------------------------	-----------	--------------------------	------------------------------------

Justification:	<p><i>Establishing or creating partnerships with new social enterprises require considerable resources and time. EFI appreciates the recommendation to re-engage in other regions, particularly in Asia and the Pacific also in view of the need for market diversification. However, the efforts will be conditional on first consolidating the operational footprint on the African continent and securing sufficient resources to expand the work elsewhere.</i></p> <p><i>With regard to the second recommendation, EFI has already created a large range of marketing materials (online, offline, social media) for the different market partners. The marketing efforts are targeted and strategic in keeping with client needs and productive capacities of the production hubs. The creation of holistic integrated product list for all partners does not meet a market demand, however.</i></p>
----------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Action points and responsibilities

Action points	Expected result/s and means of verification	Responsible office / partner	Contributing office(s) / partner(s)	Deadline [Month/Year]	Remarks
---------------	---------------------------------------------	------------------------------	-------------------------------------	-----------------------	---------

4.1 Explore opportunities to expand EFI to Asia and Pacific	Discussion with regional desks, particularly OAP	EFI WYVC	OAP, other regional offices	June 2025	Recommendation will be pursued in keeping with tangible funding opportunities. A new initiative led by OAP may provide an opportunity to reengage in Afghanistan
4.2 Improve communication between hubs and facilitate promotion of all EFI hubs to fashion buyers	Marketing materials	EFI		Already implemented with ongoing updates and new marketing initiatives.	EFI already has many tools and catalogues, each of which introduces EFI, who we are and what we do. The approach to new buyers is strategic and the team is very aware of each client's expectations in terms of design, product development, price range. EFI will continue to update and develop marketing materials taking a strategic approach.

Recommendation 5. M&E systems, impact reporting, communications and reporting need to be improved, allocating the necessary resources.

Operationally, this would require:

5.1. EFI should strive to include full time or consultant level staff in project budgets for M&E/reporting, communications and procurement. Additional staff needs need to be fed into the plans for the establishment of Kenya Country Office. If/when ITC Kenya Office is operational, some of these functions can be cost-shared between various programmes.

5.2. EFI achievements and challenges need to be classified according to the countries in log-frames and reports in the future (for the multi-country projects), with results being communicated systematically and holistically to relevant ITC Divisions and units to inform the policies and decision-making processes accordingly.

5.3. Content of the ESG Impact Assessment Reports (ESG reporting) can be linked with the M&E work for each programme (donor reporting) with achievements being reflected in the programme and ITC level indicators (corporate reporting) to improve visibility and holistic reporting on results.

5.4. SPPG Section needs to support EFI in strengthening the monitoring & reporting tools to enable the reporting of impact stories at the institutional level in a more systematic and corporate way.

Assigned to: EFI Management / WYVC Section / SPPG

Management Response and Justification [if "Partially accepted" or "Rejected"]

The recommendation is:	Accepted:	<input checked="" type="checkbox"/>	Partially accepted:	<input type="checkbox"/>	Rejected:	<input type="checkbox"/>	[mark the relevant field with "X"]
Justification:	As EFI is XB funded, the recommendations will be implemented to extent external requirements related to logframes, monitoring, reporting etc. allow for it. Concerning 5.4, ITC has a template for human impact stories that is used for the annual report and other corporate reporting and communication. EFI has the tools to report human stories and will liaise with SPPG and CE to communicate the results more systematically						

Action points and responsibilities

Action points	Expected result/s and means of verification	Responsible office / partner	Contributing office(s) / partner(s)	Deadline [Month/Year]	Remarks
---------------	---------------------------------------------	------------------------------	-------------------------------------	-----------------------	---------

5.1 Strengthen M&E resources at Programme level	Improvement in M&E reporting and timeliness, dedicated EFI M&E Focal Point	WYVC		March 2025	M&E functions in the EFI team will be strengthened in keeping with funding availability
5.2 Strengthen country lens in programming and reporting	specific country logframes and reports (for new projects)	WYVC	SPPG	January 2025	Recommendation concerns new multi-country projects. Recommendation will be implemented in keeping with external requirements for logframes, intervention logic. etc.
5.3 EFI to review programme results logic and KPI and reflect ESG reporting as appropriate	EFI model results logic that incorporates KPIs from the ESG framework	EFI, WYVC, SPPG		June 2025	EFI has specific outputs on ESG which are reported on the NPP across its project portfolio.
5.4 SPPG and CE to provide guidance on how to report impact stories institutionally and advise on M&E gaps (cf. recommendation 5.3).	A content strategy for the production and promotion of Human impact stories across the year	SPPG, CE, EFI		June 2025	Templates exist. EFI will liaise with CE to discuss strategy to disseminate widely human impact stories.
5.5 Design an engagement strategy with stakeholders to ensure the communication of outcomes	Map out key stakeholders to EFI, and plan engagement actions accordingly. The result would show how many meaningful engagements were planned to ensure the awareness of outcomes.	CE, EFI			

Recommendation 6. Generate a strategy or action plan on the inclusion of disadvantaged communities and people with disabilities in the programmes would help increase inclusivity and to embrace different dimensions of fragility with a rights-based approach.

Assigned to: *EFI Management / WYVC Section*

Management Response and Justification [if “Partially accepted” or “Rejected”]

The recommendation is:	Accepted:	<input type="checkbox"/>	Partially accepted:	<input checked="" type="checkbox"/>	Rejected:	<input type="checkbox"/>	<i>[mark the relevant field with “X”]</i>
Justification:	<i>In 2025, ITC will develop guidelines on trade and disability inclusion in project cycles and ITC value proposition on trade and PWDs. While this effort will be led by another team, EFI will contribute to it.</i>						

Action points and responsibilities

Action points	Expected result/s and means of verification	Responsible office / partner	Contributing office(s) / partner(s)	Deadline [Month/Year]	Remarks
---------------	---------------------------------------------	------------------------------	-------------------------------------	-----------------------	---------

6.1 EFI team to provide inputs on the new corporate initiatives on trade and PWDs	Disability project guidelines	WYVC	SPPG	December 2025	Project pending approval by ITC Senior Management	
<p>Recommendation 7. Explore resuming operations in Afghanistan. Resume talks with potential donors (particularly with EU and USAID) on funding a new programme for women empowerment and livelihoods sectors. In terms of operational feasibility, utilising the UNDP system can be an option to be discussed.</p> <p><i>Assigned to: EFI Management / WYVC Section / DSIT Division</i></p>						
Management Response and Justification [if "Partially accepted" or "Rejected"]						
The recommendation is:	Accepted:	<input checked="" type="checkbox"/>	Partially accepted:	<input type="checkbox"/>	Rejected:	<input type="checkbox"/> [mark the relevant field with "X"]
Justification:	Accepted. Implementation is subject to the agreement by country counterparts and funders.					
Action points and responsibilities						
Action points	Expected result/s and means of verification	Responsible office / partner	Contributing office(s) / partner(s)	Deadline [Month/Year]	Remarks	
7.1 Explore possibilities to work with artisans in Afghanistan.	New project involving EFI in Afghanistan	EFI, WYVC	OAP	March 2025	Recommendation already addressed in the context of programming new initiatives led by OAP.	
<p>Recommendation 8. EFI and SEs need to consider specific marketing activities to trace the products' stories and supply chain back to the communities. Consumer-oriented stories can connect the end users to the makers of the products, to enhance the market values and increase ITC/EFI/SE visibility. Establishing dialogue with other ITC programmes can be considered to discuss their work on this and its operational/financial feasibility</p> <p><i>Assigned to: EFI Management / WYVC Section</i></p>						
Management Response and Justification [if "Partially accepted" or "Rejected"]						
The recommendation is:	Accepted:	<input type="checkbox"/>	Partially accepted:	<input checked="" type="checkbox"/>	Rejected:	<input type="checkbox"/> [mark the relevant field with "X"]
Justification:	EFI already produces videos, brochures, labels, websites, social media posts that communicate the story behind the products. Some of our brand partners want to develop a different type of strategy for commercial reasons, where the type of story-telling recommended is not a focus -- and we respect / follow this reasoning. However, the story of artisans and producers has always been at the forefront of our visibility efforts. See also response to recommendation 4.2.					
Action points and responsibilities						
Action points	Expected result/s and means of verification	Responsible office / partner	Contributing office(s) / partner(s)	Deadline [Month/Year]	Remarks	
8.1 Create communication materials linking consumers to makers.	Brochure, video, labels sharing the story of the artisans	EFI		Jan 2024	Implemented in keeping with approach agreed together with market partners.	

Recommendation 9. Maximizing the EFI working model requires more dynamism and flexibility from ITC. Disconnected and isolationist programme structures should be minimised despite the competition between units, and more bridges need to be built even if programmes work with different business models. This needs to be established by policies and encouraged by higher management with concrete plans to enable a holistic collaboration.

Operationally, this would require:

9.1. WYVC Unit needs to facilitate increased coordination between different project teams; particularly between EFI, SheTrades, Refugees and Trade and ACP Business Friendly (Alliances for Action A4A) to discuss and explore possible areas of synergies/collaboration.

9.2. Kenya Country Manager and operational units need to be involved in the design and implementation of programmes to a higher extent to discuss needs, shape the specific programmatic requirements and to avoid inefficiency issues.

9.3. In case there are doubts on EFI's financial accountability, an audit needs to be commissioned.

Assigned to: SMC / DSIT Division / DCP Division

Management Response and Justification [if "Partially accepted" or "Rejected"]

The recommendation is:	Accepted:	Partially accepted:	x	Rejected:	[mark the relevant field with "X"]
------------------------	-----------	---------------------	---	-----------	------------------------------------

Justification:	<p><i>The creation of linkages and integration across different inclusive programmes at ITC has been a WYVC priority since 2023. This has led to several new collaborations. Examples are the integrated programming of EFI with SheTrades and Youth & Trade (e.g. new initiative in Southern Africa in partnership with Mastercard Foundation), collaboration between EFI and the team working on Indigenous Populations through joint events (e.g. WTO Public Forum) and partnerships (e.g. WIPO), in-country collaboration for vulnerable groups such as migrants (e.g. collaboration with EFI and Refugees & Trade in Kenya) or corporate initiatives such as the World Cotton Day in collaboration with OA and SEC. These efforts will continue with a focus on further strengthening the collaboration with SEC/DECI by creating a clear division of labor and synergies regarding ITC's work in the textile and garment sector where EFI focuses on the fashion and artisanal value chains and SEC focuses on the industrial aspects. Similarly, collaboration will be strengthened with A4A and T4SD in DSIT in keeping with other recommendations and related actions points outlined in this management response.</i></p> <p><i>Recommendation 9.2 is addressed through existing corporate initiatives to strengthen transparency and consultations in the project design process (e.g. 4C initiative related to project design) and country-based implementation (e.g. Country Engagement Strategy and establishment of country teams).</i></p> <p><i>With regard to recommendation 9.3, WYVC management does not see the need for an audit as all operations by EFI are XB based and subject to existing verifications and reviews.</i></p>
----------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Action points and responsibilities

Action points	Expected result/s and means of verification	Responsible office / partner	Contributing office(s) / partner(s)	Deadline [Month/Year]	Remarks
9.1 Increase linkages and collaboration with other technical sections	Regular information sharing and coordination support – Team leader meetings, joint project task forces, section meetings, brownbag sessions etc.	WYVC	All WYVC Programmes, other technical units	December 2025	Implementation is ongoing since 2023
9.2 Improved consultation and coordination in project design and implementation	Implementation of 4C approach in project design and Country Engagement Strategy.	EFI, SPPG-PDTF, Regional offices, SMC	All ITC	December 2025	Ongoing with advanced discussions at SMC level on both 4C and CES.

Recommendation 10. Provided that ITC can attract entrepreneurial industry profiles with high commitment to UN values from the relevant value chains, who can tap into the business networks, creation of SEs in other value chains/regions can be piloted as a method to allow both capacity building for small enterprises and secure strong market access (in the long run), hence, (pre)secured demand for the products.

Assigned to: ITC Senior Management / SMC / DSIT Division / DCP Division

Management Response and Justification [if "Partially accepted" or "Rejected"]

The recommendation is:	Accepted:	<input type="checkbox"/>	Partially accepted:	<input checked="" type="checkbox"/>	Rejected:	<input type="checkbox"/>	[mark the relevant field with "X"]
Justification:	<i>Partially accepted as it will require further information and discussion within ITC. EFI can prepare a presentation about the presentation and approach which can then inform the discussion and possible replication of the model by other teams.</i>						

Action points and responsibilities

Action points	Expected result/s and means of verification	Responsible office / partner	Contributing office(s) / partner(s)	Deadline [Month/Year]	Remarks
10.1 EFI to prepare a presentation of the SE model for further discussion	Presentation about the SE model	EFI	DSIT, any interested party	June 2025	

Recommendation 11. Accelerate and clarify the decisions and procedures for the establishment of ITC Country Office in Kenya. HCA, HR, ITC representation and office/organisational arrangements need to be speeded up. UNDP and UNOPS systems can be temporarily used to facilitate the transition until the -lengthy- procedural requirements are completed. An initial ITC HQ coordination mechanism to ensure harmony and mutual support among all projects in Kenya/regionally should be considered. A shared cost arrangement may be considered which takes into account project contributions. Establishing a CO is expected to create the following **advantages**: a) Streamlining several operational aspects in a more decentralized and efficient way: procurement, M&E, donors' and national partners' relationships; b) Bringing harmony to ITC projects in the region, facilitating synergies and internal coordination; c) Increasing donors' interests for funding; d) Being close to the African markets is likely to enhance ITC's work in other value chains and presence in the region.

Assigned to: ITC Senior Management / SMC

Management Response and Justification [if "Partially accepted" or "Rejected"]

The recommendation is:	Accepted:	<input type="checkbox"/>	Partially accepted:	<input checked="" type="checkbox"/>	Rejected:	<input type="checkbox"/>	[mark the relevant field with "X"]
Justification:	<i>The planned ITC Office in Nairobi will be a multi-country office. However, it is expected to deliver the benefit outlined in the recommendation above.</i>						

Action points and responsibilities

Action points	Expected result/s and means of verification	Responsible office / partner	Contributing office(s) / partner(s)	Deadline [Month/Year]	Remarks
11.1 Proceed with the creation of the ITC Nairobi Office	ITC Nairobi Office established;	OA / DED/ SMC		December 2025	Implementation is proceeding

<p>Recommendation 12. Take better advantage of EFI's strong visibility, to enhance ITC image, by using storytelling in the institutional communication efforts.</p> <p>Communication strategies can be revisited to integrate EFI's results with ITC's mission. The results and wider impact stories can be promoted better to the wider public, donors and to the UN system in general, regarding SME competitiveness in creative industries, and building skills in vulnerable, marginalised and poor communities.</p> <p>Assigned to: OED-Communication / WYVC Section / EFI Management</p>						
<p>Management Response and Justification [if "Partially accepted" or "Rejected"]</p>						
The recommendation is:	Accepted:	<input checked="" type="checkbox"/>	Partially accepted:	<input type="checkbox"/>	Rejected:	<input type="checkbox"/> [mark the relevant field with "X"]
Justification:	<p><i>Communication will be strengthened through the establishment of a corporate communications group that will facilitate coordination and exchange as well as other strategic and operational initiatives led by CE</i></p>					
<p>Action points and responsibilities</p>						
Action points	Expected result/s and means of verification	Responsible office / partner	Contributing office(s) / partner(s)	Deadline [Month/Year]	Remarks	
12.1 Joint strategic plan of communication between EFI and CE to maximise the strengths of both parties in the communication space.	CE able to harvest EFI impact stories to be published on corporate and EFI channels (website and social media).	CE EFI		December 2025		
12.2 Introduce regular planning meetings between EFI and CE to ensure effective communications of expected outcomes	Build and manage a shared a 2025 content calendar outlining key ITC communication actions and also constitute a way to share information internally about EFI's planned communications.	CE EFI		June 2025		
12.3 Plan communication actions in new spaces that will bring a growth in audience and donor awareness.	Prepare a costing paper into communications market opportunities for EFI in the documentary and streaming space including screening costs for an event to invite donors and beneficiaries in Kenya.	CE		December 2025
