Project title:	Growth for Rural Advancement and Sustainable Progress (GRASP)
Assignment title:	Review Sindh Agriculture Policy 2018-2030
Duty station:	Karachi (Sindh)
Travel:	Travel to Karachi and target districts will be required to hold consultations and presentation of the proposed law
Contract type:	Consultancy

Background

The International Trade Centre (ITC) is the joint agency of the World Trade Organization (WTO) and the United Nations (UN). It is the only development agency that is fully dedicated to supporting the internationalization of micro, small and medium enterprises (MSMEs). ITC's mission is to foster inclusive and sustainable economic development, and contribute to achieving the United Nations Global Goals for Sustainable Development.

ITC is implementing the EU funded 'Growth for Rural Advancement and Sustainable Progress' (GRASP) project which aims to contribute to the reduction of poverty through development of rural MSMEs in selected districts within two provinces of Pakistan: Balochistan and Sindh. GRASP will focus on selected product lines within livestock and horticulture.

GRASP will take a holistic approach to building MSME competitiveness in agribusiness value chains starting from a deep understanding of markets and working back through the value chain to enable MSMEs and ultimately producers to create and capture additional value. To do this, GRASP will implement three intermediary outcomes:

1. Regulatory and institutional frameworks improved at federal and provincial levels for rural value chain and MSME development.
2. Productivity, quality, and sustainability of selected value chains in horticulture and livestock improved.
3. MSME commercialization within selected value chains improved.

Under intermediary outcome 1, GRASP will seek to improve the regulatory and institutional frameworks, at federal and provincial levels in Sindh and Balochistan, in the areas of domestic commerce, agricultural policies, rural MSME development and food safety, including plant and animal health. GRASP will undertake regulatory reform by developing and sustaining policies, laws, regulations (including upgrading existing laws) and strengthening government institutions to reduce barriers to competition and market openness, and foster market dynamics, while ensuring essential social and environmental welfare. GRASP will employ highly inclusive approaches to the design and implementation of regulatory reforms through close participation of all relevant stakeholders, especially the private sector including the small hold farmers and women through

wide range consultations and public private dialogue (PPD).

Weak regulatory framework and inadequate control mechanisms in the Sindh for agricultural production, registration, certification, packaging, transportation, storage, disposal, labelling, use, inspection, testing, marketing, incident reporting (among other areas) etc. Also a continuous debate especially at grassroots level, about some important gaps in the policy and implementation strategy. The resources required to implement the policy is another domain which needs to be addressed by the implementing departments has been under discussion.

Another highlighted major issue is that the livestock sector (with separate ministry and department) has been made part of the same policy with no implementing plan, resources allocation and future expectations and needs etc. Livestock and Fisheries Department, in principle, should have its own separate policy and implementation plan. In this context, ITC is hiring a national consultant to support the Government of Sindh to review the Sindh Agriculture Policy 2018 by working closely with all relevant stakeholders from government, private sector, academia among others. The revised Policy will be drafted in close collaboration with the Sindh Agriculture Department.

Duties and responsibilities

ITC intends to hire a legal expert to review Sindh Agriculture policy for Sindh Agricultural Department by finding implementation issues, regulatory impact analysis of existing in the Sindh Agriculture Policy as well as international best practices and evolving trends. The proposed recommendations will be developed in consultation and coordination with all relevant stakeholders from public and private sectors and shall specifically cater to the needs of Agriculture Department.

The Legal Consultant will work under the guidance of the Islamabad based Policy Lead in association with Sindh GRASP Lead and under the overall supervision of GRASP Coordinator. The consultant will be required to collaborate with other ITC GRASP staff and consultants working on the GRASP project.

The consultant would be required to address the below specific objectives of the assignment:

- Review the existing Agricultural Policy for Sindh and other national and provincial laws related to and affecting the above mentioned areas of and find gaps and recommend amendments etc. The consultant will employ an inclusive approach to produce recommendations by engaging in consultations with the private sector (including more vulnerable groups such as small hold farmers, SMEs and women) to identify challenges and needs; and with relevant government departments to understand government objectives and with any other stakeholders. Based on the collected information, the consultant will develop policy options (regulatory responses) that strike a delicate balance between government objectives and ease of doing business and present them to a PPD before further legal drafting and finalization.

"The consultant has to ensure that s/he has obtained the necessary permissions with regard to intellectual property rights required to perform his/her services under this consultancy contract and for the subsequent dissemination by ITC in any form. Documentary proof is to be submitted to ITC. S/he has further to ensure to obtain accreditation to the event(s) as required. Should any license fee be due for the use of copyrighted materials of third parties, the consultant shall request the prior written permission from ITC."

Expected Outputs

Activities	Expected Outputs	Timeline
------------	------------------	----------

Conduct literature review including analysis of existing Sindh Agriculture policy and relevant historical federal and provincial laws related to the regulation of Agriculture products in the country. The review should also include the best international practices (especially from comparable countries) and based on the review, an issue paper should be developed.	Issue paper is produced	Week 1
Together with the Departmental Representative from Agriculture Department, hold consultations with the relevant stakeholders in public and private sectors to identify the challenges faced by various private sector actors from across the value chain and to gain understanding of government objectives. Subsequently, come up with a draft outline of the recommendations specifically indicating different sections and parts of the proposed law to show case structure. Along with outline develop a narrative of the proposed provisions and sections of the proposed recommendations including gaps, needs, implementation issues, rules of business etc.	Outline and narrative are produced (the areas included in the outline will be validated by ITC and Agriculture Department)	Week 2-3
Present the proposed law in a PPD in Karachi to present and select policy options that satisfy both public and private objectives	PPD is held	Week 4
Based on the discussions at PPD and feedback received from the stakeholders, develop first draft of the review of the policy and submit to ITC. Incorporate changes as suggested by ITC and Sindh Agriculture Department among other stakeholders.	First draft is produced	Week 5
Present the draft law in SRRC and or experts round table after incorporating all suggestions from stakeholders review	Proposed law is finalized and presented	Week 6
Submit final draft of the proposed law	Final draft of proposed law is submitted	Week 6

Skills

- Excellent presentation and communication skills
- Strong networking and capacity to build partnerships
- Good knowledge of institutions working on and facilitating production, certification, transportation and marketing of pesticides
- Extensive knowledge of institutional and regulatory regime in Pakistan
- Excellent legal drafting skills

Education

Master's degree (or higher) in Law, Agriculture, Economics, Business, Development studies or a closely related field. Extensive relevant experience may be accepted in lieu of the university degree. A combination of qualification in law and business/economics/agriculture would be preferred

Experience

- At least 8 years of progressively responsible experience working on issues related to legal affairs, drafting laws, economic development and policy formulation on agriculture/economic/trade/rural development matters in Pakistan.
- Experience with research and report writing in the above-mentioned fields
- Experience with project related consultancies and drafting project related documents in relation to drafting of laws, economic/trade/rural development matters

Languages

Fluency in Urdu and English required
