Egypt

In 2019 Egypt exported \$1,694 million under the Qualified Industrial Zone agreement, allowing it to export products duty-free, if they include inputs from Israel. The nation's vertically integrated supply chain offers complete production capacity. Egypt has an ideal location, situated on the northern tip of Africa on the Mediterranean, spanning into the Arab Peninsula. Twenty-one airports and 15 marine ports are just part of its growing infrastructure.

Recent internationally funded programs from the UN, Switzerland, and Sweden stimulated employment, income generation, and competitiveness in the textile and apparel sector. The moves supported small and medium enterprises with training, coaching, and mentoring and addressed social and environmental

concerns. Financing helped to efficiently integrate services, make environmental improvements, and expand into textile production to develop a more diverse industrial base. 3
